The reason for this request is due to captioning costs, turn around time, lack of captioning resources, and limited ability of our two person operation. The broadcast stations in Columbus, Georgia do not have the capabilities to provide closed captioning. The fastest closed captioning source we have found has a 5 business day turn around. The program we produce is a weekly automotive infomercial. The vehicles shown on the program arrive from the auction on Wednesday and then need to be cleaned, serviced, and ready for taping which takes up to a day. The program beings airing that Friday and runs through Sunday. As you see the turnaround time is not feasible. 								young ministry. Victory Ministries is a non-profit organization with nearly three years of network TV experience that does not fall under the closed caption requirement since the programming is only two minutes in length. Victory Ministries began airing once a week on two other networks the 4th quarter of 2005 with running times of 28:30 minutes per show and subsequently we discovered that closed caption was required for the two programs. While researching various options we discovered there would be an excessive financial strain on the ministry to either outsource the process or to purchase equipment to complete the work ourselves. One option suggested for review was an Electronic Newsroom Technique; we were disappointed to discover that Baltimore, MD is in the top 25 market that makes us ineligible for this technique.
