FCC MAIL ROOM

Hello FCC Secretary

I support the creation of low power FM broadcasting. I must insist on power sufficient to serve an entire community.

The NAB's claim of interference is false. 460 FM stations have been operating on 2nd and 3rd adjacent channels for years with NO complaints.

I suggest a business entity own only one station.

Technological improvements have made original regulations obsolete. Low power FM TV should also be addressed.

Assignment of frequencies should not be based on highest bidder this would result in the corporations owning them. They have enough. They have too much.

Applicants should should meet the Small Business Administration definition.

No. of Copies rec'd 0+8 ABCDE

028/OET

I would like to have a Notice of Proposed Rule Making on this issue. If not, at least a Notice of Inquiry.

I would support a first come - first serve approach to granting licenses.

I propose amnesty for "pirate" operators.

The community service stipulation for current large stations is not serving much. A community station would fulfill the requirement much better.

RM-9242 would allow licensees to operate at the power they desire.

The cultural diversity of current radio is very limited. Micro radio would enrich the airwaves with music and talk that corporate radio would not touch.

Please support community needs through RM-9242
