FCC MAIL ROOM

Dear Federal Communications Commission,

I am writing on behalf of the many community radio stations in this country currently operating without a license. I have worked with a number of stations and realize the importance of regulating the nation's airwaves in order to maintain clear signals for authorized stations and have some semblance of order among broadcasters. It is **simply** not possible for many stations to meet your requirements for authorization. Non-commercial radio stations can not easily raise the funds necessary to have enough watts and have non-profit status. Please consider Petition **RM-9242**. It would sincerely benefit the thousands of Americans who enjoy the voices in their communities.
