DOCKET FILE COPY ORIGINAL

Dear Secretary,

I would like to take this time to say I support your proposed rule making on LPFM and feel strongly that it would be a very valuable interest to the community and public interest.

I believe that there are alot of people that are not aware of your recent proposal on rule making and if they were aware I'm sure they will give it thumbs up. I myself would appreciate listening to a community radio station and belive strongly it would bring community awareness to just about everyone. It would also be something different to tune in a local basketball game or any other sport related activity. How about a town meeting once a week.

Childrens programs would be a great asset. I think this would be exciting for todays youth, something educational, fun and would keep them out of trouble. I myself would be honored to organize or even help put a LPFM station together. It would be well worth the effort to have something new and different. Thanks for taking the time to read my copy supporting LPFM.
