RE: EX PARTE – CS 98-120 and MB 03-15

Dear Eloise:

Following up on our November 26, 2003 telephone conference (*ex parte previously filed)*, Jimmy Goodmon conducted a QAM/POD field test to determine local digital channel positioning as seen over a Time-Warner basic cable subscription in the Raleigh-Durham DMA. The attached chart reflects the results using a RCA DLP TV, model #HDLP50W151 with a built-in QAM HD cable tuner.

If you have any questions, please give me a call.

Best regards,

Dianne
