

## ACCESS SERVICES TARIFF

7. Special Access Service7.1 General

Special Access Service provides a transmission path to connect Customer designated premises\*, either directly or through a Telephone Company hub where bridging or multiplexing functions are performed. Special Access Service also provides a transmission path to connect a Customer designated premises and a WATS Serving Office. Special Access Service includes all exchange access not utilizing Telephone Company end office switches.

The connections provided by Special Access Service can be either analog or digital. Analog connections are differentiated by spectrum and bandwidth. Digital connections are differentiated by bit rate.

7.1.1 Channel Types

There are seven types of channels used to provide Special Access Services. Each type has its own characteristics. All are subdivided by one or more of the following:

- Transmission specifications,
- Bandwidth,
- Speed (i.e., bit rate),
- Spectrum

Customers can order a basic channel and select from a list of available transmission parameters and channel interfaces those that they desire to meet specific communications requirements.

- \* Telephone Company Centrex CO-like switches are considered to be a Customer designated premises (T)  
for purposes of this tariff. (T)

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.1 General (Continued)7.1.1 Channel Types (Continued)

For purposes of ordering channels, each has been identified as a type of Special Access Service. However, such identification is not intended to limit a Customer's use of the channel nor to imply that the channel is limited to a particular use. For example, if a Customer's equipment is capable of transmitting voice over a channel that is identified as a Metallic Service in this tariff, there is no restriction against doing so.

Following is a brief description of each type of channel:

**Metallic** - a channel for the transmission of low speed varying signals at rates up to 30 baud.

**Telegraph Grade** - a channel for the transmission of binary signals at rates of 0 to 75 baud or 0 to 150 baud.

**Voice Grade** - a channel for the transmission of analog signals within an approximate bandwidth of 300 to 3000 Hz. Closed end of WATS are provided only under Voice Grade Channel type. (N) (x)  
(N) (x)

**Program Audio** - a channel for the transmission of audio signals. The nominal frequency bandwidths are from 50 to 15000 Hz, from 200 to 3500 Hz, from 100 to 5000 Hz or from 50 to 8000 Hz.

**Video** - a channel for the transmission of standard 525 line 60 field monochrome or National Television Systems Committee color video signal and one or two associated 5 or 15 kHz audio signals. The bandwidth is either 30 Hz to 4.5 MHz or 30 Hz to 6.6 MHz.

(x) Issued under authority of special permission number 86-357 of the Federal Communications Commission.

ACCESS SERVICES TARIFF

7. Special Access Service (Continued)

7.1 General (Continued)

7.1.2 Rate Categories (Continued)

(A) Channel Terminations (Continued)

Included as part of the Channel Termination is a standard channel interface arrangement which defines the technical characteristics associated with the type of facilities to which the access service is to be connected at the Point of Termination (POT) and the type of signaling capability, if any. The signaling capability itself is provided as an optional feature as set forth in (C) following. One Channel Termination charge applies per Customer designated premises at which the channel is terminated, except only one Channel Termination charge applies for WATS Access Service. This charge will apply even if the Customer designated premises and the serving wire center are collocated in a Telephone Company building.

(N) (x)  
(N) (x)

(x) Issued under authority of special permission number 87-242 of the Federal Communications Commission.

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.1 General (Continued)7.1.2 Rate Categories (Continued)(B) Channel Mileage

The Channel Mileage rate category provides for the transmission facilities between the serving wire centers associated with two Customer designated premises, between a serving wire center associated with a Customer designated premises and a Telephone Company hub, between two Telephone Company hubs, or between a serving wire center associated with a Customer designated premises (End User) and the WATS Serving Office. Channel Mileage is portrayed in miles. There are two rates that apply i.e., a fixed flat rate and a rate per mile.

(T) (x)

(D) (x)

(S) (y)

(S) (y)

(C) Optional Features and Functions

The Optional Features and Functions rate category provides for optional features and functions which may be added to a Special Access Service to improve its quality or utility to meet specific communications requirements. These are not necessarily identifiable with specific equipment, but rather represent the end result in terms of performance characteristics which may be obtained. These characteristics may be obtained by using various combinations of equipment. Although the equipment necessary to perform a specified function may be installed at various locations along the path of the service, they will be charged for as a single rate element.

(x) Issued under authority of special permission number 86-357 of the Federal Communications Commission.

(y) Reissued material effective June 1, 1986.

ACCESS SERVICES TARIFF

7. Special Access Service (Continued)

7.1 General (Continued)

7.1.2 Rate Categories (Continued)

(C) Optional Features and Functions (Continued)

Examples of Optional Features and Functions that are available include, but are not limited to, the following:

- Signaling Capability
- Hubbing Functions
- Conditioning
- Transfer Arrangements

A hub is a Telephone Company designated serving wire center at which bridging or multiplexing functions are performed. The bridging functions performed are to connect three or more Customer designated premises in a multipoint arrangement. The multiplexing functions are to channelize analog or digital facilities to individual services requiring a lower capacity or bandwidth. Exchange Carrier Association Tariff F.C.C. No. 4 identifies serving wire centers, hub locations and the type of bridging or multiplexing functions available. (T) \*

Descriptions for each of the available Optional Features and Functions are set forth in Section 15. following

\* In compliance with the order of the Federal Communications Commission in Waiver of Access Billing Requirements and Investigation of Permanent Modifications, CC Docket No. 86-104, FCC 87-252 (released July 31, 1987).

ACCESS SERVICES TARIFF

7. Special Access Service (Continued)

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.1 General (Continued)7.1.3 Service Configurations (Continued)(B) Multipoint Service

Multipoint service connects three or more Customer designated premises through a Telephone Company hub. Only certain types of Special Access Service are provided as multipoint service. These are so designated in the Service Descriptions set forth in Section 15. following.

The channel between hubs (i.e., bridging locations) on a multipoint service is a mid-link. There is no limitation on the number of mid-links available with a multipoint service. However, when more than three mid-links in tandem are provided the quality of the overall service may be degraded. Multipoint service utilizing a customized technical specifications package, as set forth in Section 15. following, will be provided when technically possible. If the Telephone Company determines that the requested characteristics for a multipoint service are not compatible, the Customer will be advised and given the opportunity to change the order.

When ordering, the Customer will specify the bridging hub(s). Exchange Carrier Association Tariff F.C.C. No. 4 identifies serving wire centers, hub locations and the type of bridging functions available. (T)

Applicable rate elements are:

- (iv) Channel terminations = 2 channel terminations (1 per CDP)
- (v) Channel mileage = 2 channel mileage terminations plus 1 segment channel mileage facility (per mile)
- (F) Optional feature = 1 customer node, plus 3 customer premises ports

(N)

ACCESS SERVICES TARIFF

- 7. Special Access Service (Continued) (M)
- 7.1 General (Continued) |
- 7.1.4 Alternate Use |
- Alternate Use occurs when a service is arranged by the Telephone Company so that the Customer can select different types of transmission at different times. A Customer may use a service in any privately beneficial manner. However, where technical or engineering changes are required to effectuate an alternate use, the Telephone Company will make such special arrangements available on an individual case basis. |
- The arrangement required to transfer the service from one operation to the other (i.e., the transfer relay and control leads) will be rated and provided on an individual case basis and filed in Section 12., Specialized Service or Arrangements. The Customer will pay the stated tariff rates for the Access Service rate elements for the service ordered (i.e., Channel Terminations, Channel Mileage [as applicable] and Optional Features and Functions [if any]). |
- 7.1.5 Special Facilities Routing |
- A Customer may request that the facilities used to provide Special Access Service be specially routed. The regulations, rates and charges for Special Facilities Routing (i.e., Avoidance, Diversity and Cable-Only) are set forth in Section 11. following. (M)

Certain regulations appearing on this page formerly appeared on page 270 of EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 1. (T)

7.1.6 Design Layout Report

At the request of the Customer, the Telephone Company will provide to the Customer the make-up of the facilities and services provided under this tariff as Special Access Service to aid the Customer in designing its overall service. This information will be provided in the form of a Design Layout Report. The Design Layout Report will be provided to the Customer at the Customer's request, and will be reissued or updated whenever these facilities are materially changed.

7.1.7 Acceptance Testing

At no additional charge, the Telephone Company will, at the Customer's request, cooperatively test, at the time of installation, the following parameters:

- (A) For Voice Grade analog services, acceptance test will include tests for loss, 3-tone slope, DC continuity, operational signaling, C-notched noise, and C-message noise when these parameters are applicable and specified in the order for service. Additionally, for Voice Grade services, a balance (improved loss) test will be made if the Customer has ordered the improved loss optional feature.

- 7.1.7 Acceptance Testing (Continued) |
- (B) For other analog services (i.e., Metallic, Telegraph, Program Audio, and Video and for digital services (i.e., Digital Data and High Capacity) service, acceptance tests will include tests for the parameters applicable to the service as specified by the Customer in the order for service. |
- In addition to the above tests, Additional Cooperative Acceptance Testing for Voice Grade service to test other parameters, as described in Section 13.3.4(B) following, is available at the Customer's request. All test results will be made available to the Customer upon request. (M) (T) (M)
- 7.1.8 Ordering Options and Conditions |
- Special Access Service is ordered under the Access Order provisions set forth in Section 5. preceding. Also included in that section are other charges which may be associated with ordering Special Access Service (e.g., Service Date Change Charges, Cancellation Charges, etc.). (M) (T) (M) (M)

Certain regulations appearing on this page formerly appeared on page 271 of EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 1.

ACCESS SERVICES TARIFF

7. Special Access Service (Continued)

7.2 Service Descriptions

For the purposes of ordering, there are seven categories of Special Access Service. These are:

- Metallic (MT)
- Telegraph Grade (TG)
- Program Audio (AP)
- Voice (VG)
- Video (TV)
- Digital Data (DA)
- High Capacity (HC)

Each service consists of a basic channel to which a technical specifications package (customized or predefined), channel interface(s) and, when desired, optional features and functions are added to construct the service desired by the Customer. The components of the service are described in Section 15.

Customized technical specifications packages will be provided where technically feasible. If the Telephone Company determines that the requested parameter specifications are not compatible, the Customer will be advised and given the opportunity to change the order.

When a customized channel is ordered the Customer will be notified whether Additional Engineering Charges apply. In such cases, the Customer will be given an estimate of the hours to be billed before any further action is taken on the order.

WATS Access Service is a Voice Grade Special Access Service that provides a connection between a Customer designated premises and a Telephone Company end office switch capable of performing the necessary screening functions for WATS. WATS Access Service is provided with rotary dial or dual tone multifrequency address signaling and either loop start or ground start supervisory signaling. The choice

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.2 Service Descriptions (Continued)

of the type of signaling is at the option of the Customer. WATS Access Service and WATS Access Lines are available for interstate communications only. Intrastate traffic will be blocked. When a serving wire center associated with a Customer designated premises and the WATS Serving Office are not colocated, a WATS Access Line provides the transmission path between the serving wire center associated with the Customer designated premises and the WATS Serving Office. The Channel Mileage rate applies to the provision of a WATS Access Line when the serving wire center associated with a Customer designated premises and the WATS Serving Office are not colocated. In addition, the Channel Termination rate applies to the provision of the communications path between a Customer designated premises and the serving wire center of that premises.

(N)

|

(N)

Channel interfaces at each Point of Termination on a two-point service may be symmetrical or asymmetrical. On a multipoint service they may also be symmetrical or asymmetrical, but communications can only be provided between compatible channel interfaces. Only certain channel interfaces are compatible. These are set forth in Section 15. following, in a combination format.

Only certain channel interface combinations are available with the predefined technical specifications packages. They are delineated in the Technical References set forth in Section 15. When a customized channel is requested, all channel interface combinations available with the specified type of service are available with the customized channel.

ACCESS SERVICES TARIFF

- 7. Special Access Service (Continued) (S) (y)
    - 7.4 Rate Regulations (Continued) | |
      - 7.4.1 Types of Rates and Charges | |
 

There are three types of rates and charges. These are monthly rates, daily rates and nonrecurring charges. The rates and charges are described as follows: | |

        - (A) Monthly Rates (S) (y)
 

Monthly rates are recurring rates that apply each month or fraction thereof that a Special Access Service is provided. For billing purposes, each month is considered to have 30 days. (T) (x)  
(S) (y)
        - (B) Daily Rates (S) (y)
 

Daily rates are recurring rates that apply to each 24 hour period or fraction thereof that a Program Audio or Video Special Access Service is provided for part-time or occasional use. For purposes of applying daily rates, the 24 hour period is not limited to a calendar day. (T) (x)  
(S) (y)

Part-time or occasional Video or Program Audio Service provided within a consecutive 30 day period will be charged the daily rate, not to exceed an amount equal to the monthly rate. For each subsequent day or part day, a charge equal to 1/30th of the monthly rate shall apply. | |
        - (C) Nonrecurring Charges | |
 

Nonrecurring charges are one-time charges that apply for specific work activity (i.e., installation or change to an existing service). The types of nonrecurring charges that apply (S) (y)
- (x) Issued on not less than 1 day's notice under authority of special permission number 86-142 of the Federal Communications Commission.
- (y) Reissued material effective March 1, 1986.

7.4 Rate Regulations (Continued)

7.4.1 Types of Rates and Charges (Continued)

(C) Nonrecurring Charges (Continued)

(3) Service Rearrangements

Service Rearrangements are changes to existing (installed) services which may be administrative only in nature, as set forth (C)(3) (Z) (y) following, or that involve actual physical change to the service. Changes to pending orders are set forth in Section 5. preceding. The Access Order Charge is applicable to pending orders and existing (N) (y) (installed) services as set forth in Section 5. preceding. (N) (y)

Changes in the physical location of the point of termination or Customer designated premises are moves as set forth in 7.4.5 following.

Changes in the type of Service or Channel Termination which result in a change of the minimum period requirement will be treated as a discontinuance of the service and an installation of a new service.

(y) Issued under authority of special permission number 89-396 of the Federal Communications Commission.

	(C) <u>Nonrecurring Charges</u> (Continued)	
	(3) <u>Service Rearrangements</u> (Continued)	
	Administrative changes will be made without charge(s) to the Customer. Administrative changes are as follows:	
	- Change of Customer name when the change of name is not the result of a transfer or change of ownership or responsibility,	(T) (x)
	- Change of Customer or Customer's end user premises address when the change of address is not a result of a physical relocation of equipment,	(T) (x)
	- Change in billing data (name, address, or contact name or telephone number),	(S) (y)
	- Change of agency authorization,	(Z) (x)
	- Change of Customer circuit identification,	(S) (y)

(x) Issued on not less than 1 day's notice under authority of special permission number 86-142 of the Federal Communications Commission.

(y) Reissued material effective March 1, 1986.

7.4 Rate Regulations (Continued)

7.4.1 Types of Rates and Charges (Continued)

(C) Nonrecurring Charges (Continued)

(3) Service Rearrangements (Continued)

- Change of billing account number,
- Change of Customer test line number,
- Change of Customer or Customer's end user contact name or telephone number, and
- Change of jurisdiction.

All other service rearrangements will be charged for as follows:

- If the change involves the addition of other Customer designated premises to an existing multipoint service, the nonrecurring charge for the channel termination rate element will apply. The charge(s) will apply only for the location(s) that is being added. The charge(s) will be in addition to an Access Order Charge as set forth in 5.2.2(E) preceding. (S) (x)
- If the change involves the addition of an optional feature or function, or (S) (x)
- If the change involves changing the type of signaling on a Voice Grade service, and for all other changes, the Access Order Charge as set forth in 5.2.2(E) preceding will apply. (S) (x)

(x) Reissued under authority of special permission number 89-396 of the Federal Communications Commission in order to advance the effective date from July 1, 1989 to June 9, 1989.

ACCESS SERVICES TARIFF

- 7. Special Access Service (Continued) (M)
  - 7.4 Rate Regulations (Continued) |
    - 7.4.2 Surcharge for Special Access Service |
      - (A) General |
        - In addition to the rates and charges described in 7.4.1 preceding, there is a monthly Special Access Surcharge that may apply to Special Access Service. The Special Access Surcharge is applied as set forth in 7.5.8 following. (M) (T)
    - 7.4.3 Message Station Equipment Recovery Charge (M)
      - The Message Station Equipment Recovery Charge is a charge to recover that portion of message station equipment that is assigned to Special Access Service. (M) |
      - Pursuant to CC Docket 83-1145 Memorandum Opinion and Order adopted by the Federal Communications on November 8, 1984, and released on November 9, 1984, this charge is assessed only to those Customers to which the Special Access Surcharge applies. The rate for the Message Station Equipment Recovery is set forth in 7.5.9 following. (M) (T)
    - 7.4.4 Minimum Periods (M)
      - The minimum service period for all services except part-time and occasional Video and Program Audio services is one month. The minimum service period for part-time and occasional Video and Program Audio services is one day (i.e., a continuous 24-hour period, not limited to a calendar day). (M)

Certain regulations appearing on this page formerly appeared on pages 327 and 328 of EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 1.

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.4 Rate Regulations (Continued)7.4.5 Moves

A move involves a change in the physical location of one of the following:

- The Point of Termination at the Customer's designated premises
- The Customer's premises

The charges for the move are dependent on whether the move is to a new location within the same building or to a different building.

(A) Moves Within the Same Building

When the move is to a new location within the same building, the charge for the move will be an amount equal to one half of the nonrecurring (i.e., installation) charge for the service termination affected. There will be no change in the minimum period requirements. This charge is in addition to the Access Order Charge as specified in 5.2.2(E) preceding. (S) (x)

(B) Moves To a Different Building

Moves to a different building will be treated as a discontinuance and start of service and all associated nonrecurring charges will apply. New minimum period requirements will be established for the new services. The Customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service.

- (x) Reissued under authority of special permission number 89-396 of the Federal Communications Commission in order to advance the effective date from July 1, 1989 to June 9, 1989.

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.4 Rate Regulations (Continued)7.4.6 Mileage Measurement

The mileage to be used to determine the monthly rate for the Channel Mileage is calculated on the airline distance between the locations involved, i.e., the serving wire centers associated with two Customer designated premises, a serving wire center associated with a Customer designated premises and a Telephone Company hub, a serving wire center associated with a Customer designated premises and a WATS Serving Office or two Telephone Company hubs. The serving wire center associated with a Customer designated premises is the serving wire center from which this Customer designated premises would normally obtain dial tone.

Mileage is shown in 7.5 following in terms of a fixed flat rate plus a per mile rate. To determine the rate to be billed, first compute the mileage using the V&H coordinates method, as set forth in EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. NO. 4 for Wire Center Information (V&H coordinates), then apply the fixed flat rate and the per mile rate for the computed mileage. When the calculation results in a fraction of a mile, always round up to the next whole mile before applying the rates. (D) (x)

When hubs are involved, mileage is computed and the fixed flat rate and the per mile rate is applied separately for each section of the Channel Mileage, i.e., Customer designated premises serving wire center to hub, hub to hub and/or hub to Customer designated premises serving wire center. However, when any service is routed through a hub for purposes other than Customer specified bridging or multiplexing (e.g., the Telephone Company chooses to so route for test access purposes), rates will be applied only to the distance calculated between the serving wire centers associated with the Customer designated premises.

(x) Issued under authority of special permission number 88-49 of the Federal Communications Commission.

## ACCESS SERVICES TARIFF

7. Special Access Service (Continued)7.4 Rate Regulations (Continued)7.4.7 Facility Hubs

A Customer has the option of ordering Voice Grade facilities or high capacity facilities (i.e., Group, Supergroup, Mastergroup, DS1, DS1C, DS2, DS3 or DS4) to a facility hub for channelizing to individual services requiring lower capacity facilities (e.g., Telegraph, Voice, Program Audio, etc.).

Different locations may be designated as hubs for different facility capacities, e.g., multiplexing from digital to digital may occur at one location while multiplexing from digital to analog may occur at a different location. When placing an Access Order the Customer will specify the desired hub. The Exchange Carrier Association Tariff F.C.C. No. 4 identifies serving wire centers, hub locations and the type of multiplexing functions available. (T)\*

Some of the types of multiplexing available include the following:

- from higher to lower bit rate
- from higher to lower bandwidth
- from digital to voice frequency channels

End to end services may be provided on channels of these facilities to a hub. The transmission performance for the end to end service provided between Customer designated premises will be that of the lower capacity or bit rate. For example, when a 1.544 Mbps facility is multiplexed to voice frequency channels, the transmission performance of the channelized services will be Voice Grade, not High Capacity.

\* In compliance with the order of the Federal Communications Commission in Waiver of Access Billing Requirements and Investigation of Permanent Modifications, CC Docket No. 86-104, FCC 87-252 (released July 31, 1987).

7.5.8 Surcharge for Special Access Service

(1) General

- (A) Special Access services provided under this tariff may be subject to the monthly Special Access Surcharge.
- (B) The Special Access Surcharge will apply to each interstate Special Access Service including WATS Access Service, that terminates on an end user's PBX or other device where, through a function of the device, the Special Access Service interconnects to the local exchange network. Interconnection functions include but are not limited to wiring and software functions, bridging, switching or patching of calls or stations. The Surcharge will apply irrespective of whether the interconnection function is performed in equipment located at the Customer's designated premises or in a Centrex Co-type switch. (N) (x)
- (C) The Surcharge will apply as set forth in 7.5.8(1)(B) preceding, except that a surcharge will be assessed on a per voice grade equivalent basis for Special Access Services derived from High Capacity Special Access Services as shown in the following example:

<u>Special Access Facility</u>	<u>Voice Grade Equivalent</u>	<u>Surcharge</u>	<u>Monthly Charge</u>

## ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services

Digital Subscriber Line Access Services provide transmission services over local exchange service copper facilities that can be used for simultaneous voice and data communications. Service is provided, where available, between customer designated premises and designated Telephone Company Serving Wire Centers.

8.1 Asymmetric Digital Subscriber Line Access Service8.1.1 General

Asymmetric Digital Subscriber Line (ADSL) Access Service enables data traffic generated by a customer-provided modem to be transported to a DSL Access Service Connection Point using the Telephone Company's local exchange service facilities. A DSL Access Service Connection Point is an interconnection point designated by the Telephone Company that aggregates data traffic from and to Telephone Company ADSL-equipped Serving Wire Centers (SWCs). The DSL Access Service Connection Point may be located within the operating territory of the Telephone Company or in the operating territory of another telephone company, provided both telephone companies agree to such an arrangement.

At the DSL Access Service Connection Point, the customer's ADSL Access Service must be connected to a telecommunications service provider's customer designated premises using either the Telephone Company's Special Access or Frame Relay Access Services when the Connection Point is located within the Telephone Company's operating territory. When the Connection Point is located in the operating territory of another telephone company, the customer's ADSL Access Service must be connected to a telecommunications service provider's customer designated premises using equivalent access services provided by that telephone company.

A generic view of how ADSL Access Service would be interconnected with a telecommunications service provider's network is as follows: the customer's ADSL-equipped serving wire center is designated as a DSL Access Service Connection Point. The customer orders ADSL Access Service pursuant to the provisions specified in this section. The ADSL Access Service customer's telecommunications service provider orders

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.1 Asymmetric Digital Subscriber Line Access Service (Continued)

8.1.1 General (Continued)

Special Access Service and/or Frame Relay Access service pursuant to the provisions specified in Section 7, to connect its customer designated premises to the DSL Access Service Connection Point.

8.1.2 Limitations

Unless otherwise specified, ADSL Access Service is available at a maximum upstream speed of 512 kbps (i.e., from the customer's equipment up to the DSL Access Service Connection Point) and a maximum downstream speed of 1.544 Mbps (from the DSL Access Service Connection Point down to the customer's equipment). These peak speeds are not guaranteed by the Telephone Company due to factors that may affect the actual speeds delivered, including loop distance from the Telephone Company Serving Wire Center, condition of the facilities, and limitations in the telecommunications service provider's network design. The Telephone Company does not provide customer premises equipment (CPE) in conjunction with the ADSL Access Service offering.

ADSL Access Service may not be used in conjunction with multi-point Special Access Service configurations as described in Section 7.

## ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)8.1 Asymmetric Digital Subscriber Line Access Service (Continued)8.1.2 Limitations (Continued)

ADSL Access Service will be furnished where suitable facilities exist as determined by the Telephone Company. The Telephone Company will identify its ADSL-equipped Serving Wire Centers and DSL Access Service Connection Points will be identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff F.C.C. No. 4.

ADSL Access Service will be provided over existing Telephone Company local exchange service lines. Rates and regulations for ADSL Access Service are in addition to any rates and regulations that apply for the associated local exchange service line provided under the terms and conditions in the Telephone Company's general and/or local exchange service tariffs. The Telephone Company will automatically disconnect ADSL Access Service when the associated local exchange service line is disconnected for any reason.

Rates and regulations for Special Access Service and Frame Relay Access Service provided under this tariff will apply for the access service(s) provided between the telecommunications service provider's customer designated premises and the DSL Access Service Connection Point.

8.1.3 Undertaking of the Telephone Company

The Telephone Company will provide ADSL Access Service at rates and charges as set forth in 8.1.6, as follows:

- (A) The Telephone Company will determine if the associated local exchange service line is suitable for use with ADSL Access Service. Service will not be provided on lines that the Telephone Company determines are not suitable for ADSL Access Service or on lines that produce interference with other services provided by the Telephone Company.
- (B) The Telephone Company, after determining if the local exchange service line is suitable for ADSL Access Service, will notify the customer if any additional CPE is necessary to support ADSL Access Service.
- (C) The Telephone Company will provision and maintain ADSL Access Service from the DSL Connection Point to the Point of Termination at the ADSL Access Service customer's premises.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.1 Asymmetric Digital Subscriber Line Access Service (Continued)

8.1.4 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to ADSL Access Service:

- (A) The customer is responsible for providing the Telephone Company with the necessary information to provision ADSL Access Service (e.g., customer name, telephone number and premises address; billing name and address when different from the customer name and premises address; customer contact name and telephone number and the contact name and telephone number of the telecommunications service provider with which the customer's ADSL Access Service will interconnect).
- (B) The customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with ADSL Access Service and complies with the standards specified in Technical Reference ANSI T1.413-1998.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.1 Asymmetric Digital Subscriber Line Access Service (Continued)

8.1.5 Rate Regulations

This section contains the regulations governing the rates and charges that apply for ADSL Access Service. Regulations governing the rates and charges for the Special Access and Frame Relay Access Services provided under this tariff used in conjunction with ADSL Access Service are as specified in Section 7, preceding.

(A) Minimum Period

The minimum period for which ADSL Access Service is provided to a customer and for which charges are applicable is one month.

(B) Moves

(1) A move involves a change in the physical location of one of the following:

- The Point of Termination at the ADSL Access Service customer designated premises

- The ADSL Access Service customer designated premises

(2) The provisions for moves of ADSL Access Service are the same as those described in 7.4.5, preceding, except that an Access Order Charge will not apply.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.1 Asymmetric Digital Subscriber Line Access Service (Continued)

8.1.5 Rate Regulations (Continued)

(C) Temporary Suspension of Service

When the associated local exchange service line over which ADSL Access Service is provided is temporarily suspended, the ADSL Access Service and one-half of the ADSL Line Charge monthly rate will be temporarily suspended for the time period that the associated local exchange service is suspended.

(D) Rate Categories

There are two types of rates and charges applicable to ADSL Access Service. These are a monthly rate and a nonrecurring charge.

The monthly rate applies each month or fraction thereof for each local exchange service line equipped with ADSL Access Service.

A nonrecurring charge applies per local exchange service line for the installation of ADSL Access Service.

Rates and charges for ADSL Access Service are as set forth in 8.1.6 following, when the customer purchases ADSL Access Service under the DSL Access Services Discount Pricing Arrangement described in 8.2, following.

8.1.6 Rates and Charges

Regulations concerning Asymmetric Digital Subscriber Line Access Service are set forth in 8.1.5 preceding.

<u>ADSL Line Charge</u>	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
Per local exchange telephone service line	\$35.95	\$ 95.00

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 DSL Access Services Discount Pricing Arrangement (Continued)

8.2.1 General

The telecommunications services offered under the DSL Access Services Discount Pricing Arrangement (DPA) are provided at wholesale rates to the customer under the conditions listed below.

- (A) The customer purchases ADSL Access Service as described in 8.1, preceding, for the purpose of combining these telecommunications services with its own information service(s) to create a new retail service for sale to its end user customer(s).
- (B) In addition to the obligations specified in 8.1.4, preceding, the customer assumes the following obligations:
  - (1) The customer will deal directly with its end user customers with respect to all matters pertaining to the service provided, including marketing, sales, ordering, installation, maintenance, trouble reporting, repair, billing and collections. The customer will not direct its end users to contact the Telephone Company for any aspect of the service the customer provides.
  - (2) The customer will submit orders for ADSL Access Service to the Telephone Company in a format and manner designated by the Telephone Company.
  - (3) The customer will obtain the appropriate authorization to allow the Telephone Company to provision ADSL Voice-Data Access Service over the customer's end user's existing telephone exchange service line.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 DSL Access Services Discount Pricing Arrangement (Continued)

8.2.1 General (Continued)

When the customer purchases ADSL Access Service under the DSL Access Services DPA, the rates and charges, preceding, will apply in lieu of rates and charges as specified in 8.1.6, for ADSL Access Service.

Services provided under the DSL Access Services DPA are available under a Monthly Plan at the rates and charges, preceding, or under a "Term Plan" described following.

A monthly charge applies for each ADSL service line covered under DPA. A nonrecurring charge applies for the installation of each ADSL service line under the DPA.

The Telephone Company will bill the customer an Access Order Charge, per order, to convert in-service ADSL service lines originally purchased under the provisions specified in 8.1, preceding, to the DSL Access Services DPA, provided the customer obtains written authorization from its end users authorizing such conversions, where necessary. Per line nonrecurring charges specified in 8.1.6, do not apply to conversion of in-service ADSL Access Lines to a DPA.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 DSL Access Services Discount Pricing Arrangement (Continued)

8.2.2 Term Plan

(A) Description

The Term Plan provides the customer with reduced rates based on the length of the customer's term commitment. The Term Plan is available for terms of one or three years. The Telephone Company will establish a Term Plan for each Serving Wire Center (SWC) based on the customer's order notifying the Telephone Company which ADSL-equipped SWC(s) the customer wants included in the plan(s) and the selected term commitment for each SWC. An Access Order Charge applies for each order to establish the Term Plan(s).

When the customer subscribes to a Term Plan, all in-service ADSL Access Service lines provided out of and subsequently installed at the included SWC will be billed the rates and charges specified in 8.2.3, following, for the length of the term commitment. In addition to the applicable ADSL Line Charges, the customer will be billed a recurring monthly Term Plan Charge for each SWC included in a Term Plan, following.

If the Telephone Company decreases the rates, as specified in 8.2.3 following, during the term of the commitment period, the decreased rates will automatically be applied for the remainder of the current commitment period.

## ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)8.2 DSL Access Services Discount Pricing Arrangement (Continued)8.2.2 Term Plan (Continued)(A) Description (Continued)

At the end of the Term Plan, the customer may elect to establish a new Term Plan commitment, convert to the rates available under the Monthly Plan, or discontinue service. If the customer does not make an election by the end of the Term Plan, the rates for all ADSL Access Service lines will automatically be converted to the rates available under the Monthly Plan in 8.2.3, following. An Access Order Charge will not apply to any election made by the customer at the end of the Term Plan.

A Term Plan is subject to payment for early termination as described in (D), following.

(B) Upgrades in Term Plan

A customer may terminate a Term Plan without the application of a termination liability charge when the customer replaces its original term commitment with a new Term Plan commitment provided the length of the new term commitment is of equal or greater length than the length of the original term commitment. An Access Order Charge will not apply when the customer replaces an existing Term Plan with a new Term Plan commitment under this provision.

(C) Termination without Liability

A customer may terminate a Term Plan without the application of a termination liability charge if the Telephone Company increases the Term Plan monthly rates, following, during the term of the existing commitment. The customer has 90 days following such rate increase to notify the Telephone Company in writing of its intent to terminate its Term Plan under this section; otherwise, the increased rates will apply for the remainder of the commitment period.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 DSL Access Services Discount Pricing Arrangement (Continued)

8.2.2 Term Plan (Continued)

(D) Termination with Liability

If the customer elects to terminate its Term Plan(s) prior to the end of the commitment period for any reason other than specified in (B) or (C), preceding, a termination liability charge will apply. For each Term Plan terminated prior to the end of the commitment period, the Telephone Company will bill the customer a charge equal to the monthly Term Plan Charge as described following, multiplied by the number of months remaining in the commitment period.

Monthly Plan rates as described following, will apply to all in-service ADSL Access Lines following the early termination of a Term Plan.

## ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)8.2 Symmetric Digital Subscriber Line Access Service8.2.1 General

Symmetric Digital Subscriber Line (SDSL) Access Service provides the customer the ability to transmit data to (upstream rate) and receive data from (downstream rate) a DSL Access Service Connection Point at the same speed using the customer's existing local exchange copper facilities. At the DSL Access Service Connection Point, the customer's SDSL Access Service must be connected to a telecommunications service provider's customer designated premise using either the Telephone Company's Special Access or Frame Relay Access Services. A DSL Access Service Connection Point is an interconnection point designated by the Telephone Company that aggregates data traffic from and to Telephone Company SDSL Serving Wire Centers (SWCs).

SDSL Access Service is available as two service options, i.e., SDSL Voice-Data and SDSL Data-Only.

- (A) The SDSL Voice-Data option provides transmission of data signals at a peak data transmission speed of 768 kbps using the SDSL Access Service customer's existing local exchange service line.

This option may be used for simultaneous voice and data communications.

- (B) The SDSL Data-Only option provides transmission of data signals at a peak transmission speed of 768 kbps using the SDSL Access Service customer's existing local exchange copper facilities. This option does not provide the ability to transmit voice communications.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 Symmetric Digital Subscriber Line Access Service (Continued)

8.2.1 General (Continued)

A generic view of how SDSL Access Service would be interconnected with a telecommunications service provider's network is as follows: the customer's serving wire center is designated as a DSL Access Service Connection Point. The customer orders SDSL Access Service pursuant to the provisions specified in this section. The SDSL Access Service customer's telecommunications service provider orders Special Access Service and/or Frame Relay Access Service pursuant to the provisions specified in Section 7., to connect its customer designated premises to the DSL Access Service Connection Point.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 Symmetric Digital Subscriber Line Access Service (Continued)

8.2.2 Limitations

SDSL Access Service is available as two service options as described above. Peak speeds are not guaranteed by the Telephone Company due to factors that may affect the actual speeds delivered, including the SDSL Access Service customer's distance from the Telephone Company Serving Wire Center, condition of the existing copper facilities, and limitations in the telecommunications service provider's network design.

The Telephone Company does not provide customer premises equipment (CPE) in conjunction with the SDSL Access Service offering.

SDSL Access Service may not be used in conjunction with multi-point Special Access Service configurations as described in Section 7.

SDSL Access Service will be furnished where suitable facilities exist as determined by the Telephone Company. SDSL Serving Wire Centers and DSL Access Service Connection Points will be identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. Tariff F.C.C. No. 4.

When the customer orders the SDSL Voice-Data option, the rates and regulations for SDSL Access Service are in addition to any rates and regulations that apply for the SDSL Access Service customer's local exchange service line.

Rates and regulations for Special Access Service and Frame Relay Access Service will apply for the access service(s) provided between the telecommunications service provider's customer designated premises and the DSL Access Service Connection Point, as described in Section 7.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 Symmetric Digital Subscriber Line Access Service (Continued)

8.2.3 Undertaking of the Telephone Company

The Telephone Company will provide SDSL Access Service at the rates and charges set forth in "Rates and Charges" following:

- (A) The Telephone Company will determine if the customer's existing local exchange service line or copper facilities are suitable for use with the SDSL Access Service option ordered by the customer. Service will not be provided on facilities that the Telephone Company determines are not suitable for SDSL Access Service or on facilities that produce interference with other services provided by the Telephone Company.
- (B) The Telephone Company, after determining if the facilities are suitable for SDSL Access Service, will notify the customer if the customer's CPE is compatible with the equipment deployed in the Telephone Company's Serving Wire Center and if any additional CPE is necessary to support SDSL Access Service.
- (C) The Telephone Company will provision and maintain SDSL Access Service from the DSL Connection Point to the Point of Termination at the customer's premises.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 Symmetric Digital Subscriber Line Access Service (Continued)

8.2.4 Obligations of the Customer

In addition to the regulations described in other sections of this tariff, the following provisions apply to SDSL Access Service:

- (A) For each SDSL Voice-Data option ordered by the customer, the customer must subscribe to a local exchange service line from the Telephone Company pursuant to the Telephone Company's general and/or local exchange service tariffs. The Telephone Company will automatically disconnect SDSL Access Service Voice-Data option when the associated local exchange service line is disconnected for any reason.
- (B) The customer is responsible for providing the Telephone Company with the necessary information to provision SDSL Access Service (e.g., customer name, telephone number and premises address; billing name and address when different from the customer name and premises address; customer contact name and telephone number and the contact name and telephone number of the telecommunications service provider with which the customer's SDSL Access Service will interconnect).
- (C) The customer is responsible for providing and maintaining all required customer provided equipment (CPE), which is compatible with SDSL Access Service.

ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)

8.2 Symmetric Digital Subscriber Line Access Service (Continued)

8.2.5 Rate Regulations

This section contains the regulations governing the rates and charges that apply for SDSL Access Service. Regulations governing the rates and charges for the Special Access and Frame Relay Access Services used in conjunction with SDSL Access Service are as specified in Section 7. The rates for SDSL Access Service will be billed to the subscriber of the local exchange service.

(A) Minimum Period

The minimum period for which SDSL Access Service is provided to a customer and for which charges are applicable is one month.

(B) Moves

A move involves a change in the physical location of one of the following:

The Point of Termination at the customer designated premises

The customer designated premises

The provisions for moves of SDSL Access Service are the same as those described in 7.4.5, preceding, except that an Access Order Charge will not apply to move orders for the SDSL Access Service Voice-Data option.

(C) Temporary Suspension of Service

When a SDSL Access Service customer that has ordered the SDSL Voice-Data option temporarily suspends its local exchange service, the SDSL Access Service and one-half of the SDSL Line Charge monthly rate will be temporarily suspended for the time period that the associated local exchange service is suspended.

## ACCESS SERVICES TARIFF

All material on this page is new.

8. Digital Subscriber Line Access Services (Continued)8.2 Symmetric Digital Subscriber Line Access Service (Continued)8.2.5 Rate Regulations (Continued)(D) Rate Categories

There are two types of rates and charges applicable to SDSL Access Service. These are a monthly rate and a nonrecurring charge.

The monthly rate applies each month or fraction thereof for each SDSL Voice-Data option and SDSL Data-Only option ordered by the customer.

A nonrecurring charge applies for each SDSL Voice-Data and SDSL Data-Only option ordered by the customer for the installation of SDSL Access Service.

Rates and charges for SDSL Access Service are as set forth in "Rates and Charges" following.

8.2.6 Rates and Charges

Regulations concerning Symmetric Digital Subscriber Line Access Service are set forth in "Rate Regulations" preceding.

<u>SDSL Line Charge</u>	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
Per Voice-Data Option 768 kbps	\$35.95	\$ 95.00
Per Data-Only Option 768 kbps	99.00	181.00

|     | The Company will provide Directory Access Service to a Customer to Directory Assistance (DA) Service Locations (DA location).  |                    |
| 9.1 | <u>General Description</u>   |                    |
|     | DA Service provides Directory Access Service to DA locations, use of DA access equipment, and use of DA operators to provide telephone numbers.  | (S) (y)<br>(C) (x) |
| 9.2 | <u>Undertaking of the Telephone Company</u>  | (S) (y)            |
|     | (A) A Telephone Company DA operator, when furnished a name and locality, will provide or attempt to provide the telephone number listed in the Telephone Company DA records associated with the name given at the rates and charges as set forth in 9.6 following. The Telephone Company's contact with the Customer's end user shall be limited to that effort necessary to process a Customer's end user's request for a telephone number; and the Telephone Company will not transfer, forward or redial a Customer's end user call to any other location for any purpose other than provision of DA Service. | (N)                |
|     | (B) A maximum of two (2) requests for telephone numbers will be accepted per call to the DA operator.  |                    |
|     | (C) A telephone number which is not listed in DA records will not be available to the Customer's end user.   | (N)                |

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued)

9.2 Undertaking of the Telephone Company (Continued)

- (D) The Telephone Company will specify the DA location which provides the DA Service for each numbering plan area code (NPA). The DA locations are as shown in EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. NO. 4, and Section 16. of this tariff. (T)

When it becomes necessary, as determined by the Telephone Company, to change a DA location, the Telephone Company will notify the involved customers six months prior to the change. For such changes, the regulations as set forth in 2.1.7 preceding apply.

- (E) When DA Service is ordered, Directory Access Service will be provided between the Customer designated premises and the DA location by the Telephone Company at rates and charges as set forth in 9.6 following, as follows.

(1) General

Each Directory Access Service will consist of the following:

- An Interface Group equipped with an available Premises Interface Code at the Customer's designated premise.
- Directory Transport between the premises of the ordering Customer and the DA location.

ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued)

9.2 Undertaking of the Telephone Company (Continued)

(E) (Continued)

(2) Interface Group and Premise Interface Code (Continued)

Such Premise Interface Codes are described in Section 15. following. When Directory Access Service is combined with Feature Group D Switched Access Service, the Premise Interface Code for the combination will be the available Premise Interface Code provided for the Feature Group D Switched Access Service ordered by the Customer. Except as set forth in 9.4(A) following, the Interface Groups and Premises Interface Codes provided under a Special Order for Directory Access Service are subject to the order conditions as set forth in Section 5. preceding. For purposes of applying the order regulations, a DA location is considered to be a Customer end user serving wire center. (C)

(3) Directory Transport

Directory Transport provides the transmission facilities and transport termination between the premises of the ordering Customer and the DA location.

## ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued)9.2 Undertaking of the Telephone Company (Continued)

(E) (Continued)

(3) Directory Transport (Continued)

Directory Transport is a two-way voice frequency transmission path composed of facilities determined by the Telephone Company. The two-way voice frequency path transports calls in the terminating direction (from the premises of the ordering Customer to the DA location). The voice frequency transmission path may be comprised of any form or configuration of plant capable of and typically used in the telecommunications industry for the transmission of voice and associated telephone signals within the frequency band width of approximately 300 to 3000 Hz.

The Telephone Company will determine whether the Directory Access Service is to be routed directly to a DA location or through an access tandem switch appropriately equipped for DA measurement and served by DA trunks to the DA location when such an access tandem switch is available. The combination of Feature Group D Switched Access Service with DA Service will only be provided at such available and appropriately equipped access tandem switches. If the Customer desires the traffic routing to be other than that selected by the Telephone Company, it may request a cooperative effort to determine if Customer specified traffic routing can be used in lieu of the Telephone Company selected traffic routing. (C)

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (S) (y)
- 9.2 Undertaking of the Telephone Company (Continued) (S) (y)
  - E. (Continued) (T) (x)
    - (3) Directory Transport (Continued) (S) (y)
 

When Directory Transport is provided using a direct route to the DA location, no address signaling is provided. When Directory Transport is provided with the use of an access tandem switch, wink start-start pulsing signaling is provided at the access tandem switch. The Customer will be notified by the Telephone Company when access tandem routing is provided and the Customer shall address each call to the DA location using NPA + 555 + 1212 or when required by the Telephone Company, 555-1212. Only NPA codes handled by the DA location served by the access tandem switch will be processed.

The number of Directory Transport transmission paths provided is based on the Customer's order and is determined by the Telephone Company in a manner similar to Switched Access Service transmission paths as set forth in Section 15.1.3(E) following.

Directory Transport may, at the option of the Customer, be provided for both interstate and intrastate communications. When the Customer

9. Directory Assistance Service (Continued)

9.2 Undertaking of the Telephone Company (Continued)

(E) (Continued)

(6) Transmission Specifications (Continued)

When Directory Access Service is combined with Feature Group D Switched Access Service, Type B Transmission Specification is provided. Type A, B and C Transmission Specifications are set forth in Section 15.1.2 following. (C)

(7) Acceptance Testing and Testing Capabilities

The acceptance testing and testing capabilities for Directory Access Service traffic routed through an access tandem are the same as those for the associated Feature Group D end office switching. The acceptance testing for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth in Section 6.1.6 preceding. The testing capabilities for Directory Access Service traffic routed directly to or routed in a separate trunk group through an access tandem to the DA location will be as set forth for cooperative scheduled testing or manual scheduled testing in Section 13. following. (C)

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (S) (y)
- 9.2 Undertaking of the Telephone Company (Continued) (S) (y)
  - (F) Trunk side switching is provided at the DA Service access location. The DA Service access location will provide trunk answer and disconnect supervisory signaling. (N)
  - (G) The Telephone Company will distribute the calls received over the Directory Access Services to the DA operators using the DA location access equipment. |
  - (H) In the event that the telephone number is unavailable to the DA operator, no credit applies for the charge for the call to the DA operator. When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided, a credit as set forth in 9.4(H) following will apply. (N)
  - (I) Directory Access Service may, at the option of the Customer, be provided for interstate and intrastate communications. When the Customer requests such mixed access, the interstate Directory Access Service charges will be determined by the Telephone Company using the data furnished by the Customer as set forth in Section 2.3.10 preceding. | 9.3 | <u>Obligations of the Customer</u>  |                 |
|     | (A) The Customer shall determine and order the busy hour minutes of capacity and interface type of Directory Access Services it needs for DA Service.   |                 |
|     | (B) When Directory Access Service is initially ordered, the Customer shall order the service for at least six months. Thereafter, additional service may be ordered for a minimum of six months. Not later than three months prior to the end of the six-month period, the Customer shall notify the Telephone Company if the service is to be discontinued at the end of the six month period. If no notice is received from the Customer, the Telephone Company will automatically extend the service for another six months and all appropriate charges as set forth in 9.6 following for another six months will apply. |                 |
|     | (C) The Customer facilities at the premises of the ordering Customer shall provide the necessary on-hook and off-hook supervision.  | (S) (y)         |
|     | (D) When requested by the Telephone Company, the Customer shall order a separate trunk group for DA Service for each NPA. The conditions when the Customer will be requested to order separate trunk groups for each NPA are set forth in 9.2(E)(1) preceding.  | (N)<br> <br>(N) |

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued)

9.3 Obligations of the Customer (Continued)

(E) When the Customer bills its end users, the Customer shall be responsible for all contacts and arrangements with its end users concerning the provision and maintenance of DA Service furnished to its end users.

(D)  
|  
|  
|  
|  
(D)

(F) The Customer understands that DA operators will respond to only two (2) telephone number requests per call and will not transfer, forward or redial the call to another location for any purpose other than the provision of DA Service.

9.4 Payment Arrangements

A. Minimum Periods

The minimum period for which DA Service and the Directory Access Service is provided and for which charges apply is six months. A minimum period of six months applies for each additional period of service ordered or extended.

If DA Service is discontinued prior to the end of each six month period, the charges that apply for the remaining months are the non-recoverable costs. Such costs include the non-recoverable cost of equipment and material ordered, provided or used, plus the non-recoverable cost of installation and removal including the costs of engineering, labor, supervision, transportation, rights-of-way and other associated costs less estimated net salvage.

ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued) (N)

9.4 Payment Arrangements (Continued)

B. Minimum Monthly Charge

DA service is subject to a minimum monthly charge. The minimum monthly charge consists of the following elements:

The minimum monthly charge for Directory Assistance Service calls is the charge as set forth in 9.6 following for the actual usage for the month.

For the Directory Transport rate element, the minimum monthly charge is assessed in terms of a Minimum Monthly Usage Charge (MMUC). If the Directory Transport usage charges based on the actual usage for the month are greater than the MMUC, the Customer will be assessed the usage charges based on actual usage. If the Directory Transport usage charges based on the actual usage for the month are lower than the MMUC, the Customer will be assessed the MMUC charge. The MMUC is determined as set forth in C. following. Rates for actual usage are set forth in 9.6 following.

(N)

ACCESS SERVICES TARIFF

9. Directory Assistance Service (Continued)

9.4 Payment Arrangements (Continued)

C. Minimum Monthly Usage Charge (MMUC)

The Minimum Monthly Usage Charge (MMUC) for Directory Transport is a charge that varies by Directory Assistance Service busy hour minutes of capacity (BHMC) provided for the customer's use to the DA location.

BHMC is the Directory Assistance Service busy hour minutes of capacity provided for the customer's use to the DA location.

MMUC equals the Minimum Directory Transport charge per BHMC times the BHMC provided.

The Minimum Directory Transport charge per BHMC for Directory Transport charge per BHMC for Directory Assistance is as follows:

Minimum Directory Transport  
Charge per BHMC

Per BHMC        \$

(C) \*

\* The application of this rate element is in abeyance pending revised rate development procedures in compliance with the Memorandum Opinion and Order of the Federal Communications Commission in Annual 1985 Access Tariff Filings, CC Docket No. 86-125, Phase II, FCC 87-50 (released March 9, 1987); Order, Mimeo No. 3103 (released May 5, 1987).

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (S) (y)
- 9.4 Payment Arrangements (Continued) (S) (y)
  - D. Cancellation of a Special Order (T)
 

A Customer may cancel a Special Order for Directory Access Service on any date prior to the service date. The cancellation date is the date the Telephone Company receives written or verbal notice from the Customer that the Special Order is to be canceled. The verbal notice must be followed by written confirmation within 10 days. (S) (y)

When a Customer cancels a Special Order for Directory Access Service after the order date but prior to the start of service, the appropriate charges as set forth in Section 5. preceding apply for the Directory Access Service canceled. In addition, a charge equal to any unrecoverable capital costs incurred by the Telephone Company will apply to the Customer. (S) (y)

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (S) (y)
- 9.4 Payment Arrangements (Continued) (S) (y)
  - E. Changes to Special Orders (T)
 

When a Customer requests changes to a pending order for Directory Access Service, such changes will be undertaken if they can be accommodated by the Telephone Company. The appropriate charges as set forth in Section 5. preceding apply for the Directory Access Service changed. In addition, a charge equal to any other costs incurred by the Telephone Company because of the change will apply. (S) (y)
  - F. Moves (T)
 

A move involves a change in the physical location of the point of termination at the Customer designated premises or of the Customer designated premises. Moves will be treated as set forth in Section 6.3.4 preceding and all associated nonrecurring charges will apply. Minimum period requirements will be established at the new location as set forth in Section 6.3.4 preceding. The Customer will also remain responsible for satisfying all outstanding minimum period charges for the discontinued service. (S) (y)
  - G. Directory Access Service Rearrangements (T)
 

Nonrecurring charges apply for service rearrangements. Service rearrangements are as set forth in Section 6.3.1(C)(2) preceding. The Service Rearrangement Charges are as set forth in Section 6.3.1(C)(2) preceding for the type of change provided by the Telephone Company. (S) (y)

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (S) (y)
- 9.4 Payment Arrangements (Continued) (S) (y)
- H. Credit Allowance for DA Service (N)
  - (1) When the DA location or DA operator equipment or terminals are out of service due to a Telephone Company equipment failure or an incorrect number is provided and a Customer DA call has been answered or forwarded to a DA operator, a credit allowance for a call answered or forwarded to the DA operator equal to the rate for a Directory Assistance Service Call as set forth in 9.6(A) following plus the rate for a Directory Transport call as set forth in 9.6(B) following will be applied to the Customer's charges.
  - (2) In addition to the credit as set forth in (1) preceding, when a DA operator or DA equipment provides an incorrect number for a call and the Customer reports such occurrences to the Telephone Company, a credit allowance for such DA call will apply. The credit will be as set forth in (3) following. When the Customer reports such a call and the number requested, the number provided and the reason the number provided is incorrect, the number of calls for which a credit will apply will be developed by the Telephone Company in cooperation with the Customer. (N)

(y) Reissued material effective March 1, 1986.

Certain regulations previously found on this page can now be found on Page 433.1.

ACCESS SERVICES TARIFF

- 9. Directory Assistance Service (Continued) (N)
  - 9.5 Rate Regulations
    - (A) The Directory Assistance service call charge, as set forth in 9.6(A) following, applies for each call to DA Service. A call is a call which has been answered by or forwarded to a DA operator. The charge applies whether or not the DA operator provides the requested telephone number. The number of calls answered or forwarded to DA operators will be accumulated by Telephone Company measuring equipment. A credit for the provision of an incorrect telephone number will be applied as set forth in 9.4 H. preceding. (N)
    - (B) The Directory Transport provides the transmission facility and transport termination from the serving wire center for the premises of the ordering Customer to the DA location. Title page notwithstanding, these two wire centers may be in different LATAs. In addition, the premises of the ordering Customer must be in the LATA where Directory Access service is requested or in the LATA where the DA location is located. The rate for Directory Transport is calculated on a per call basis. (T)

9.5 Rate Regulations (Continued)

(C) The charge per call for Directory Transport, as set forth in 9.6(B) following, applies for each call to DA service. A call is as set forth in (A) preceding. The number of calls will be accumulated as set forth in (A) preceding.

9.6 Rates and Charges

The rates and charges are:

	<u>Rates</u>	
(A) Directory Assistance Service call, each	\$0.26	
(B) Directory Access Service		
- Directory Access Service and Installation Charge		Charges are the same as those set forth in Section 6.5.9 and Section 3. preceding, for FGD Switched Access Service. (C)
		<u>Rate Per Call</u>
- Directory Transport		.0115

ACCESS SERVICES TARIFF

10. Special Federal Government Access Services (S) (y)

10.1 General (S) (y)

The Company is not now providing this service. General regulations are set forth in this section. Specific regulations and rates will be added to the tariff at such time as there is a Customer request for service. (N) (x)

This section covers Special Access Services that are provided to a Customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government. Services provided to state emergency operations centers are included. These services provide for command and control communications, including communications for national security, emergency preparedness and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security. (N) (x)

Services for command and control communications and for national security and emergency preparedness sometimes require short notice and short duration service provisions. These provisions are especially needed to meet presidential requirements or in response to natural, man-made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period. The provision of service under these conditions may require the availability of facilities, such as portable microwave equipment, which are provided on a temporary basis by the Telephone Company or Customer. (S) (y)

10.2 Emergency Conditions

These services will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories: (S) (y)

(x) Issued on not less than 1 day's notice under authority of special permission number 86-142 of the Federal Communications Commission.

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

10. Special Federal Government Access Services (Continued)

10.2 Emergency Conditions (Continued)

- State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters").
- Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad. (Includes space vehicle recovery and protection efforts.)
- Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.
- Political unrest in foreign countries which affect the national interest.
- Presidential service.

ACCESS SERVICES TARIFF

11.	<u>Special Facilities Routing of Access Services</u>	(S) (y)
11.1	<u>Description of Special Facilities Routing of Access Services</u>	(S) (y)
	The Company is not now providing this service. General regulations are set forth in this section. Specific regulations and rates will be added to the tariff at such time as there is a Customer request for service.	(N) (x)     (N) (x)
	The services provided under this tariff are provided over such routes and facilities as the Telephone Company may elect. Special Facilities Routing is involved when, in order to comply with requirements specified by the Customer, the Telephone Company provides Switched Access Service, Special Access Service or Special Federal Government Access Service in a manner which includes one or more of the following conditions:	(S) (y)                     
11.1.1	<u>Diversity</u>	
	Two or more services must be provided over not more than two different physical routes.	
11.1.2	<u>Avoidance</u>	
	A service must be provided on a route which avoids specified geographical locations.	
11.1.3	<u>Cable-Only Facilities</u>	
	Certain Voice Grade Services are provided on Cable-Only Facilities to meet the particular needs of a Customer.	 (S) (y)

(x) Issued on not less than 1 day's notice under authority of special permission number 86-142 of the Federal Communications Commission.

(y) Reissued material effective March 1, 1986.

ACCESS SERVICES TARIFF

- 11. Special Facilities Routing of Access Services (Continued) (M)
- 11.1 Description of Special Facilities Routing of Access Services (Continued) |
- 11.1.3 Cable-Only Facilities (Continued) |
- Service is provided subject to the availability of Cable-Only facilities. In the event of service failure, restoration will be made through the use of any available facilities as selected by the Telephone Company. |
- Avoidance and Diversity are available on Switched Access Service as set forth in Section 6. preceding; Narrowband, and Voice Grade and Special Access Services as set forth in Sections 15.2.1(A), 15.2.1(B) and 15.2.1(E) following and Special Federal Government Access Services as set forth in Section 10. preceding. Cable-Only Facilities are available for Switched Access Service as set forth in Section 6. preceding; Voice Grade Special Access Services as set forth in Section 15.2.1(C) following and Special Federal Government Access Services as set forth in Section 10. preceding. (M) (T) (M) (T) (M)
- In order to avoid the compromise of special routing information, the Telephone Company will provide the required routing information for each specially routed service to only the ordering Customer. If requested by the Customer, this information will be provided when service is installed and prior to any subsequent changes in routing. (M)

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (S) (y)
- In this section normally scheduled working hours are an employee's scheduled work period in any given calendar day (e.g., 8:30 a.m. to 4:30 p.m.) for the application of rates based on working hours. (S) (y)
- A Miscellaneous Service Order Charge applies to any service, or combination of services ordered simultaneously from this section of the Tariff for which a service order is not already pending. The Miscellaneous Service Order Charge is an administrative charge designed to compensate for the expenses associated with service order issuance. (N)
- The charge always applies to the following services since a pending service order would not exist: Overtime Repair (13.2.2), Standby Repair (13.2.3), Testing and Maintenance with Other Telephone Companies other than when in conjunction with Acceptance Testing (13.2.4), Other Labor (13.2.5) and Maintenance of Service (13.3.1). The Miscellaneous Service Order Charge will also apply to the following services if they are ordered subsequent to the initial installation of the associated access service, thereby necessitating the issuance of another service order: Restoration Priority (13.3.1), Standard Jacks (13.3.3), Protective Connecting Arrangements (13.3.6) and Controller Arrangement [13.3.7(A)].
- The charge does not apply to the following services since there would exist a pending service order: Additional Engineering (13.1), Overtime Installation (13.2.1), Standby Acceptance Testing (13.2.3), Testing and Maintenance with Other Telephone Companies when in conjunction with Acceptance Testing (13.2.4), and Additional Cooperative Acceptance Testing [13.3.4(A)(1) and 13.3.4(B)(1)]. This charge is as follows:
- Miscellaneous Service Order Charge, per occurrence      \$30.00 (N)

(y) Reissued material effective March 1, 1986.

Certain regulations previously found on this page can now be found on page 452.1.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued) (M)

13.1 Additional Engineering (Continued) (M)

13.1.1 Charges for Additional Engineering (T)

The charges for Additional Engineering are as follows: (M)

Additional Engineering Periods	USOC	First Half Hour or Fraction Thereof	Each Additional Half Hour or Fraction Thereof
(A) Basic Time, normally scheduled working hours, per engineer	AEH	\$12.81 (R)	\$ 6.41 (R)
(B) Overtime, outside of normally scheduled working hours, per engineer	AEH	\$38.44 (R)	9.61 (R)

13.2 Additional Labor

Additional labor is that labor requested by the Customer on a given service and agreed to by the Telephone Company as set forth in 13.2.1 through 13.2.5 following. The Telephone Company will notify the Customer that additional labor charges as set forth in 13.2.6 following will apply before any additional labor is undertaken. (M)

Certain regulations appearing on this page formerly appeared on pages 617 and 618 of EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 1.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued) (M)

13.2 Additional Labor (Continued)

13.2.1 Overtime Installation

Overtime installation is that Telephone Company installation effort outside of normally scheduled working hours.

13.2.2 Overtime Repair

Overtime repair is that Telephone Company maintenance effort performed outside of normally scheduled working hours.

13.2.3 Stand by

Stand by includes all time in excess of one-half (1/2) hour during which Telephone Company personnel stand by to make installation acceptance tests or cooperative tests with a Customer to verify facility repair on a given service.

(M)

Certain regulations appearing on this page formerly appeared on page 618 of EXCHANGE CARRIER ASSOCIATION TARIFF F.C.C. No. 1.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued) (M)

13.2. Additional Labor (Continued)

13.2.4 Testing and Maintenance with Other Telephone Companies

Additional testing, maintenance or repair of facilities which connect to facilities of other Telephone Companies, which is in addition to normal effort required to test, maintain or repair facilities provided solely by the Telephone Company.

13.2.5 Other Labor

Other labor is that additional labor not included in 13.2.1 through 13.2.4 preceding, including, but not limited to labor incurred for the installation of inside wire, used to extend the Point of Termination as set forth in Section 2.1.5 preceding, and labor incurred to accommodate a specific Customer request that involves only labor which is not covered by any other section of this tariff. 13.3 Miscellaneous Services

13.3.1 Maintenance of Service

- (A) When a Customer reports a trouble to the Telephone Company for clearance and no trouble is found in the Telephone Company's facilities, the Customer shall be responsible for payment of a Maintenance of Service charge for the period of time from when Telephone Company personnel are dispatched to the Customer designated premises to when the work is completed. Failure of Telephone Company personnel to find trouble in Telephone Company facilities will result in no charge if the trouble is actually in those facilities, but not discovered at the time. (T)
- (B) The Customer shall be responsible for payment of a Maintenance of Service Charge when the Telephone Company dispatches personnel to the Customer's designated premises, and the trouble is in equipment or communications systems provided by other than the Telephone Company or in detariffed CPE provided by the Telephone Company.

In either (A) or (B) preceding, no credit allowance will be applicable for the interruption involved if the Maintenance of Service Charge applies.

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued)

13.3 Miscellaneous Services (Continued)

13.3.4 Testing Services (Continued)

(A) Switched Access Service (Continued)

(M)

Nonscheduled tests are performed by the Telephone Company "on demand", which result in the measurement of Switched Access Services. Nonscheduled tests may involve Telephone Company technicians at Telephone Company offices and at the Customer's designated premises.

Testing services are ordered to the Dial Tone Office for FGA and to the end office for FGD. Testing Services for Directory Assistance Service not routed through an access tandem is ordered to a Directory Assistance Location for each NPA.

(C)

(1) Additional Cooperative Acceptance Testing

Additional Cooperative Acceptance Testing (ACAT) of Switched Access Service involves the Telephone Company provision of a technician at its office(s) and the Customer provides a technician at its premises, with suitable test equipment to perform the required tests.

(M)

Additional Cooperative Acceptance Tests may, for example, consist of the following tests:

- C-Notched Noise
- Impulse Noise
- Phase Jitter

Certain material previously found on this page can now be found on 2nd Revised Page 474.  
Certain material on this page formerly appeared on 1st Revised Page 474.

- Signal to C-Notched Noise Ratio
- Intermodulation (Nonlinear) Distortion
- Frequency Shift (Offset)
- Envelope Delay Distortion
- Dial Pulse Percent Break

(2) Automatic Scheduled Testing

Automatic Scheduled Testing (AST) of Switched Access Services (Feature Group D), where the Customer provides remote office test lines and 105 test lines with associated responders or their functional equivalent, will consist of monthly loss and C-message noise tests and annual balance test. However, the Customer may specify a more frequent schedule of tests. In addition to the loss/noise/balance tests, the Customer may also order, at additional charges, gain-slope and C-notched noise testing. (C)

The Telephone Company will provide a monthly AST report that lists the test results for each trunk tested. Trunk test failures requiring Customer participation for trouble resolution will be provided to the Customer on an as-occurs basis.

13.3.7 Miscellaneous Equipment

(A) Controller Arrangement

This arrangement enables the customer to control up to 48 transfer functions at a Telephone Company central office via a remote keyboard terminal capable of either 300 or 1200 bps operation. Included as part of the Controller Arrangement is a dial-up data station located at the Telephone Company Central Office to provide access to the Controller Arrangement. This dial-up data station consists of a 212A DATAPHONE data set and an appropriate Telephone Company provided channel.

The Controller Arrangement must be located in the same Telephone Company central office as the transfer functions which it controls.

USOC	Monthly <u>Charge</u>
------	--------------------------

- Per arrangement XTDDU \$100.00

13.3.8 International Blocking Service

The Telephone Company will provide International Blocking Service to business customers who obtain local exchange service from the Telephone Company under its general or local exchange tariffs and to business customers who obtain Feature Group A Switched Access service under this tariff. This Service is only provided at appropriately equipped Telephone Company end offices. Those offices providing International Blocking Service are identified in National Exchange Carrier Association, Inc. Tariff F.C.C. No. 4. (C)

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued)

13.3 Miscellaneous Services (Continued)

13.3.8 International Blocking Service (Continued)

(N)

On each line or trunk for which International Blocking Service is ordered, the Telephone Company will block all direct dialed international calls that use the call sequence of 011+ or 10XXX-011+. When capable, the Telephone Company will route the blocked calls to a recorded message.

An International Blocking Service charge as set forth below is applicable for each new or existing exchange line or trunk or Feature Group A Switched Access line to which International Blocking Service is added or removed. This charge does not apply when blocking is removed from an exchange line or trunk or Feature Group A Switched Access line at the same time that it is disconnected.

A Miscellaneous Service Order Charge as set forth on Page 452 of this tariff will apply to orders adding or removing International Blocking Service that are placed subsequent to the initial installation of the associated exchange line(s) or trunk(s) or Feature Group A Switched Access line(s). This charge does not apply when blocking is removed from an exchange line or trunk or Feature Group A Switched Access line at the same time that it is disconnected.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued)

13.3 Miscellaneous Services (Continued)

13.3.9 Billing Name and Address Services (BNA)

(N) (x)

Billing name and address services will be provided to interexchange carriers, operator service providers, enhanced service providers, and any other provider of telecommunications services or to a third party hired by a telecommunications service provider to perform billing and collection services for the telecommunications service provider ONLY when an end user has offered a calling card account or line account (for collect and third party calls) as payment for the telecommunication provider's services.

No telecommunications service provider or authorized billing and collection agent of a telecommunication service provider shall use billing name and address information for any purpose other than billing customers for using telecommunications services of that service provider and collecting amounts due.

BNA will be provided upon request in the Company's standard tape or paper format. Such request must be on the telecommunication service provider's letterhead. BNA will not be provided on a bulk basis.

Nonrecurring Rates

Per Each Request:

**Magnetic tape** \$110.00 per tape, plus .10 cents per record

**Paper format** \$ 5.00 first record, .25 cents per each additional record

**Special format** ICB

(N) (x)

(x) Issued under authority of special permission number 93-398 of the Federal Communications Commission.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued)

13.3 Miscellaneous Services (Continued)

13.3.10 900 Blocking Service

(N) (x)

The Telephone Company will provide 900 Blocking service to Customers who obtain local exchange Service from the Telephone Company under its general or local exchange tariffs and to Customers who obtain Feature Group A Switched Access service under this tariff. This service is only provided at appropriately equipped end offices. Those offices providing 900 Blocking Service are identified in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. NO. 4.

On each line or trunk for which 900 Blocking Service is ordered, the Telephone Company will block all direct dialed calls placed to a 900 number. When capable, the Telephone Company will route the blocked calls to a recorded message. Verbal orders for 900 Blocking Service will be accepted.

A Blocking Service charge as set forth following is applicable when ordered by the end user customer with the following exceptions:

- Blocking access to 900 Service is offered to all subscribers at no charge from November 29, 1993 through December 31, 1993.
- Blocking access to 900 Service is offered to all subscribers at no charge at the time telephone service is established at a new number and for 60 days thereafter.

The Blocking Service charge is applied for each line, trunk or Feature Group A Switched Access service to which 900 Blocking Service is added or removed. Requests by subscribers to remove 900 Blocking Service must be in writing. This charge does not apply when blocking is removed from an exchange line or trunk or Feature Group A Switched Access line at the same time it is disconnected.

<u>900 Blocking Service</u>	<u>Nonrecurring Charge</u>	
- Per exchange service line or trunk and/or per Feature Group A Switched Access line	\$8.58	(N) (x)

All material on this page is new.

ACCESS SERVICES TARIFF

13. Additional Engineering, Additional Labor and Miscellaneous Services (Continued)

13.3 Miscellaneous Services (Continued)

13.3.11 Coin Supervision Additive Service

The Telephone Company will provide Coin Supervision Additive Service to Payphone Service Providers (PSPs) who order local exchange service lines for the provision of pay telephone service and where the pay telephone equipment connected to the local exchange service lines requires central office coin supervision capability. The local exchange service lines used for the provision of pay telephone service are obtained from and subject to the terms and conditions under the Telephone Company's general and/or local tariffs.

Coin Supervision Additive Service provides the capability of central office line equipment to pass signals and/or tones from a local exchange service line to a trunk terminating at the PSP's operator service provider. These signals enable an operator service provider to recognize coin deposits and return coins to the pay telephone user. Coin Supervision Additive Service also permits a suitably equipped operator service provider to automatically ring back the originating local exchange service line upon completion of a call.

A Coin Supervision Additive Service charge set forth following is assessed monthly to the PSP for each local exchange service line for which Coin Supervision Additive Service is provided.

**Coin Supervision Additive Service**

-	per exchange service line, per month	\$ 2.21

13.3 Miscellaneous Services (Continued)

13.3.12 Unauthorized PIC Change

If an IC requests a Primary Interexchange Carrier (PIC) change on behalf of a billed party (e.g., an end user or the designator of the PIC for a pay telephone), and the billed party subsequently denies requesting the change, and the IC is unable to substantiate the change with a letter of authorization signed by the billed party; then:

- The billed party will be reassigned to its previously selected IC. No charge will apply to the billed party for this reassignment.
- The Unauthorized Presubscription Change Charge as set forth following will apply to the IC that requested the unauthorized PIC change. This charge is applied in addition to the \$5.00 PIC change charge.

**Unauthorized PIC Change Charge**

- Residence/Business - per telephone service line  
or trunk \$ 35.65
- Per Pay Telephone exchange service line  
or trunk \$ 57.57

13.4 Presubscription

13.4.1 Presubscription is the process by which end user customers may select and designate to the Telephone Company an IC to access, without an access code, for interLATA, interstate calls. This IC is referred to as the end user's predesignated IC.

13.4.2 End users may select one of the following options at no charge:

- indicate a primary IC for all of its lines,
- indicate a different IC for each of its lines.

Only one IC may be selected for each line or lines terminating in the same hunt group.

End users may designate that they do not want to presubscribe to any IC. The end user must arrange this designation by directly notifying the Telephone Company's business office. This choice will require the end user to dial an access code (10XXX or 101XXXX) for all interstate calls.

After the end user's initial selection of a predesignated IC or the designation that they do not want to presubscribe to any IC, for any change in selection after conversion to Equal Access in the serving end office, a nonrecurring charge, as set forth in 13.4.9, will apply.

All material on this page is new.

13.4 Presubscription (Continued)

13.4.3 After the allocation process has to be completed, end users assigned to an IC via the allocation process may change their IC one time within 6 (six) months after conversion to Equal Access in the serving end office at no charge.

Following the 6 (six) month period after conversion to Equal Access for any change in selection, a nonrecurring charge as set forth in 13.4.9 will apply.

13.4.4 In the event that two or more ICs have provided to the Telephone Company notifications with the same authorization date(s), and one IC notification has already been processed by the Telephone Company, those IC notifications not yet processed would be returned to the ICs.

13.4.5 New end users who are served by end offices equipped with FGD will be asked to presubscribe to an IC at the time they place an order with the Telephone Company for Telephone Exchange Service. They may select either of the following options. There will be no charge for this initial selection.

- designate a primary IC for all of its lines,
- designate a different IC for each of its lines.

Only one IC may be selected for each individual line, or lines terminating in the same hunt group. Subsequent to the installation of Telephone Exchange Service and after the end user's initial selection of a predesignated IC, for any change in selection, a nonrecurring charge, as set forth in 13.4.9, applies.

13.4 Presubscription (Continued)

13.4.6 If the new end user fails to designate an IC as its predesignated IC prior to the date of installation of Telephone Exchange Service, the Telephone Company will (1) allocate the end user to an IC based upon current IC presubscription ratios, (2) require the end user to dial an access code (10XXX or 101XXXX) for all interstate calls, or (3) block the end user from interstate calling. The end user will be notified which option will be applied if they fail to presubscribe to an IC. An allocated or blocked end user may designate another, or initial, IC as its predesignated IC one time at no charge, if it is requested within six (6) months after the installation of Telephone Exchange Service.

For any change in selection after six (6) months from the installation of Telephone Exchange Service, a nonrecurring charge, as set forth 13.4.9, applies.

13.4.7 If an IC elects to discontinue its FGD service offering prior to or within 2 years of the conversion, the IC will notify the Telephone Company of the cancellation. The IC will also notify all end users which selected them that they are canceling their service and that they should contact the Telephone Company to select a new primary IC. The IC will also inform the end user that it will pay the presubscription change charge. The canceling IC will then be billed by the Telephone Company the appropriate charge for each end user for a period of two years from the discontinuance of FGD service.

13.4 Presubscription (Continued)

13.4.8 If an IC elects to change or discontinue use of a Carrier Identification Code (CIC) for any reasons other than those set forth in 13.4.8 above, the IC will identify to the Telephone Company any affected end users and advise the Telephone Company of the new CIC to be assigned to these end users. If the CIC change involves a change of carrier for any end users, the IC will notify the affected end users of the change. The Telephone Company will change the predesignated carrier code of each end user identified by the IC to the new CIC and bill the IC the nonrecurring charge as set forth following for each end user line or trunk that is changed.

13.4.9 Nonrecurring Charge

This charge is generally billed to the end user who is the subscriber to the Telephone Exchange Service. In those instances where the IC both requests the presubscription change, and requests the associated charge be billed to it, the Telephone Company will bill the IC. In the event an end user is incorrectly presubscribed due to miss assignment on the part of the Telephone Company, no charge shall apply. In the event an end user is incorrectly presubscribed due to miss assignment on the part of the IC, and the IC is unable to document such an assignment, the Telephone Company will apply the charge to the IC responsible for the missassignment of the end user and assign the end user to an IC of the end user's choice.

-	Charge per Telephone Exchange Service Line or Trunk	<b>\$ 5.00</b>

13.5 Verification of Orders for Long Distance Telemarketing

No IC shall submit to the Telephone Company a Primary Interexchange Carrier (PIC) change order generated by telemarketing unless and until the order has first been confirmed in accordance with one of the following procedures:

13.5.1 The IC obtains the billed party's (e.g., an end user or the designator of the PIC for a pay telephone) written authorization to submit the PIC change order and confirms:

- The billed party's billing name and address and each telephone number to be covered by the PIC change order;
- The billed party's decision to change the PIC to the IC; and
- The billed party's understanding of the PIC change fee; or

13.5.2 The IC obtains the billed party's electronic authorization to submit the PIC change order. The billed party will place a call, from the telephone number(s) on which the PIC is to be changed, to a toll free telephone number that is dedicated to the IC's PIC verification process. The verification number will connect the billed party to a voice response unit that records the originating ANI and the required information described in 13.5.1 preceding; or

13.5.3 An appropriately qualified and independent third party, operating in a location physically separate from the telemarketing representative, obtains the billed party's oral authorization to submit the PIC change order. This authorization must confirm the order and include appropriate verification data (e.g., the billed party's date of birth or social security number); or

13.5 Verification of Orders for Long Distance Telemarketing (Continued)

13.5.4 Within three business days of the billed party's request for a PIC change, the IC must send them an information package by first class mail which includes:

- a statement that the enclosed information is being sent to confirm a telemarketing order placed by the billed party within the previous week,
- the name of the current and soliciting ICs,
- the terms, conditions or charges for the PIC change,
- the name of the person who ordered the change,
- the name, address and telephone number of both the customer and the soliciting IC,
- a statement advising the billed party that, absent their response, the change will be implemented fourteen (14) days from the date the information package was mailed to them,
- the name, address and telephone number of a contact point at the FCC for customer complaints.

The IC must provide a postpaid postcard which the billed party can use to deny, cancel or confirm the order. The IC must wait fourteen (14) days after the information package is mailed to the billed party before submitting the PIC change order to the Telephone Company.
