13. END USER FIA (Cont'd)13.10 Rate Regulations

- (A) When the end user's local service is provided by the Telephone Company, the end user will be charged the End User Access Charge. When end user local service is provided by a local service provider that resells local service (reseller), the reseller will be charged the End User Access Charge.
- (B) Residence rates, as set forth in 13.11 following, apply to common lines that are subject to residential rates under Telephone Company General and/or Local tariffs.

End user residence common line rates are applied as primary or nonprimary.

Until January 1, 1999, the primary residence end user common line rates will apply to only one line when the customer has more than one line billed on a single account for the same service name at the same service address.

Effective January 1, 1999, the designation of primary and nonprimary will be changed as follows. The primary rate is assessed to the residential subscriber line which is any or all of the following:

- 1) the only line provided at that service address; or,
- 2) the first line installed at that location. Any additional residence exchange lines at the same service location, regardless of the named subscriber, will be assessed the nonprimary rate; or,
- 3) the line designated as the primary by the billed party or parties when multiple exchange lines are ordered at the same time for the same service location.

In most cases only one line at a service location can be classified primary, all others are considered to be nonprimary.

The primary residence end user common line charge shall be reduced up to \$6.50 for lifeline service. (l)

Business Multiline rates, as set forth in 13.11, apply to common lines, that are not subject to residential rates under Telephone Company General and/or Local tariffs when more than one such line is obtained by the same customer within a state from the same Telephone Company and to all pay telephone common lines.
