

ACCESS SERVICE

10. Federal Government Access Services10.1 General

This section covers Access Services that are provided to a customer for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government. Services provided to state emergency operations centers are included. These services provide for command and control communications, including communications for national security, emergency preparedness and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security. In addition, this section covers the Telecommunications Service Priority (TSP) System service and procedures as set forth in 10.8.1(D) since it is administered by the Federal Government.

Services for command and control communications and for national security and emergency preparedness may sometimes be provided under non-emergency conditions for a short duration to determine network assurance. However, the Telephone Company reserves the right to limit or to decline participation in these non-emergency condition requests for service.

10.2 Emergency Conditions

These services will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

- (A) State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters").

(This page filed under Transmittal No. 23)

Issued: April 13, 2001

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.2 Emergency Conditions (Cont'd)

- (B) Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad. (Includes space vehicle recovery and protection efforts.)
- (C) Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.
- (D) The director (Cabinet level) of a Federal department, Commander of a Unified/Specified Command, or head of a military department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.
- (E) Political unrest in foreign countries which affect the national interest.
- (F) Presidential service.

10.3 Intervals to Provide Service

Certain services provided under the provisions of this section of the tariff are provided on an individual case basis. Therefore, orders for such service shall be placed under the negotiated Interval provisions set forth in 5.2.1.(B) preceding.

(This page filed under Transmittal No. 23)

Effective: April 28, 2001

Vice President
2980 Fairview Park Drive, Falls Church, Virginia 22042

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.4 Facility Availability

In order to insure communications during periods of emergency, the Telephone Company will, within the limits of good management, make available the necessary facilities to restore service in the event of damage or to provide temporary emergency service as set forth in Section 10.8.1(D) and 10.8.2.(D), following.

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize government-owned facilities, when necessary to provide service.

10.5 Federal Government Regulations

In accordance with Federal Government Regulations, all service provided to the Federal Government will be billed in arrears. However, this provision does not apply to other customers that obtain services under the provisions of this tariff to provide their services to the Federal Government.

10.6 Mileage Application

Mileage, when used for rate application between two customer designated premises, shall be determined by the V and H Coordinates Method as set forth in NATIONAL EXCHANGE CARRIER ASSOCIATION, INC. TARIFF F.C.C. No. 4 for WIRE CENTER INFORMATION (V and H coordinates).

10.7 Move Charges

When service is moved to a different building, the nonrecurring charge applies; when moved to a new location in the same building, a charge of one-half the nonrecurring charge applies.

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services

The following unique services are provided to a customer for use only by agencies or branches of the Federal Government, other authorized users and state emergency operations centers. The rates and charges for certain services shall be developed on an individual case basis and shall be consistent with the rates and charges for services offered in other sections of this tariff.

10.8.1 Type and Description(A) Voice Grade Special Access Services(1) Voice Grade Secure Communications Type I

Approximate bandwidth of 10-50,000 Hertz.
Furnished for two-point secure communications on two-wire or four-wire metallic facilities between two customer premises. Services are conditioned as follows:

T-3 Conditioning - The absolute loss (referenced to 1 milliwatt) with respect to frequency shall not exceed:

15 dB at 10 Hz
13 dB at 100 Hz
9 dB at 1,000 Hz
20 dB at 10,000 Hz
30 dB at 50,000 Hz

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(A) Voice Grade Special Access Services (Cont'd)(1) Voice Grade Secure Communications Type I
(Cont'd)

Additional conditioning (available in one or two directions on four-wire facilities only) to provide the following characteristics:

The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

0 dB at 1,000 Hz
± 1 dB between 1,000 Hz and 40,000 Hz
± 2 dB between 10 Hz and 50,000 Hz
(+ means more loss)

The net loss of the conditioned service (with or without additional conditioning) shall not vary by more than four dB at 1,000 Hz from the levels specified above. Voice frequency signaling or supervisory tones can be transmitted.

(2) Voice Grade Secure Communications Type II

Approximate bandwidth 10-50,000 Hz. Furnished on four-wire metallic facilities for duplex operation for two-point secure communications between an IC premises on an End User's premises and an End User's premises. Services are conditioned as follows:

G-1 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same as Voice Grade Secure Communications Type I services without additional conditioning. Voice frequency signaling or supervisory tones can be transmitted.

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)

10.8 Security and Emergency Services (Cont'd)

10.8.1 Type and Description (Cont'd)

(B) Wideband Data Special Access Service

Service arrangements for secured communications to accommodate the transmission of binary digital baseband signals in a random polar format.

(1) Wideband Secure Communications Type I

For transmission at the rate of 18,750 bits per second.

(2) Wideband Secure Communications Type II

For transmission at the rate of 50,000 bits per second.

(3) Wideband Secure Communications Type III

To accommodate the transmission of restored polar two-level facsimile signals with a minimum signal element width of twenty microseconds at a rate of 50,000 bits per second.

To accommodate the transmission of binary digital baseband signals in a random polar format at the rate of 50,000 bits per second.

(C) Special Routing Access Service

Special Routing Access Service is a specialized service for use by carriers authorized to provide their service for an agency or branch of the Federal Government. This service provides the customer's end users the ability to originate and terminate calls to or from the customer's premises.

(This page filed under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

Vice President
2980 Fairview Park Drive, Falls Church, Virginia 22042

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(C) Special Routing Access Service (Cont'd)

This service is an optional service which operates in conjunction with Trunk Side Premium Access Service furnished under other provisions of this tariff.

The Telephone Company will manually record Special Routing Access Service Active Mode Trunk Usage, and will bill the customer in accordance with these records. The hours for each trunk ordered will be summed and then rounded to the nearest half hour, except that when the initial activation total is less than one hour, one hour will be used to determine the charge.

(D) Telecommunications Service Priority (TSP) System

- (1) Priority installation and/or restoration of National Security Emergency Preparedness (NSEP) telecommunications services shall be provided in accordance with Part 64.401, Appendix A, of the Federal Communications Commission's (FCC's) Rules and Regulations.

In addition, TSP System service shall be provided in accordance with the guidelines set forth in "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service Vendor Handbook" (NCSH 3-1-2) dated July 9, 1990, and "Telecommunications Service Priority (TSP) System for National Security Emergency Preparedness (NSEP) Service User Manual" (NCSM 3-1-1).

The TSP System is a service, developed to meet the requirements of the Federal Government, as specified in the Service Vendor's Handbook and Service User's Manual which provides the regulatory, administrative and operational framework for the priority installation and/or restoration of NSEP telecommunications services. These include both Switched and Special Access Services. The TSP System applies only to NSEP telecommunications services, and requires and authorizes priority action by the Telephone Company providing such services.

- (2) The TSP System's applicability is limited to Access Services which the Telephone Company can discreetly identify for priority provisioning and/or restoration.

(This page filed under Transmittal No. 23)

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System
(Cont'd)

- (3) Some of the elements required for the TSP System are included in other sections of this tariff as general service offerings. They have been referenced in this section to reflect the complete TSP System with appropriate references to those other sections of the tariff for regulations, rates and charges.
- (4) The customer for TSP System Service also must be the same customer for the Access Service with which it is associated.
- (5) Under certain conditions it may be necessary to preempt one or more customer services with a lower or no restoration priority in order to install or restore NSEP telecommunications service(s) of a higher priority. If such preemption is necessary, and if circumstances permit, the Telephone Company will make reasonable effort to notify the preempted service customer of the action to be taken. Credit allowance for such service preemption shall be made in accordance with the provisions set forth in 2.4.4(E) preceding concerning Temporary Surrender of a Service.
- (6) The customer, in obtaining TSP System service, acknowledges and consents to the provision of certain customer service record information by the Telephone Company to the Federal Government, as specified in the TSP Service Vendor Handbook, in order for the Government to maintain and administer its overall TSP System. This customer service record information will include only TSP Authorization Code and Telephone Company Circuit/Service ID.
- (7) When Priority Restoration Maintenance and Administration, as defined in the TSP Service Vendor Handbook, is discontinued (Revocation of Assigned Restoration Priority), and the associated Access Service is continued in service, the charge specified in 10.8.2(D) (2) (C) will not apply for such a discontinuance.

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)10.8 Security and Emergency Services (Cont'd)10.8.1 Type and Description (Cont'd)(D) Telecommunications Service Priority (TSP) System
(Cont'd)

- (8) Credit allowance for service interruption for Priority Restoration Maintenance and Administration shall be the same as for the Access Service with which it is associated as set forth in 2.4.4 preceding.
- (9) Certain activities performed by the Telephone Company in association with the TSP System are as follows:
 - (a) Priority Installation Invocation includes System Implementation, Verification, Confirmation, and Preemption.
 - (b) Priority Restoration Level Implementation includes System Implementation, Verification, and Confirmation.
 - (c) Priority Restoration Level Change includes Verification and Confirmation.
 - (d) Priority Restoration Maintenance and Administration includes Reconciliation and Preemption.
- (10) The customer, in obtaining a Priority Restoration, recognizes that quoting charges and obtaining permission to proceed with the installation or restoration of certain Access Services will cause unnecessary delays. In subscribing to Priority Restoration service the customer recognizes this condition and grants the Telephone Company the right to quote charges after the restoration has been completed.

 Regulations, rates and charges are the same as those set forth in 5.2.2(D) preceding for the Switched or Special Access Service for which PI is required.

(b) Utilizing Specially Constructed Facilities:
 Regulations, rates and Facilities charges are the same as those set forth in the appropriate Special Construction Tariff for Switched or Special Access Services for which PI is required (see Section 1.5 preceding).

* When an Access Service is ordered with both PI and PR, the associated nonrecurring charge for PR applies.

ACCESS SERVICE

10. Federal Government Access Services (Cont'd)

10.9 Specialized Service and Arrangements

Services provided in this section are unique service arrangements for agencies and branches of the Federal Government, and other users authorized by the Federal Government. The rates and charges for these services are developed on an individual case basis. Unless otherwise stated these services are offered in the Washington LATA.

10.9.1 Reserved

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Service and Arrangements10.9.2 Government Emergency Telecommunications-Alternate Carrier Routing Service (GETS-ACR)

GETS-ACR is an emergency telecommunications service offered by the United States Government Office of the Manager, National Communications System (OMNCS). Access to GETS-ACR is accomplished through the use of the 710 non-geographical Numbering Plan Area (NPA) code activated in end offices and tandem switching office systems, and by an Interexchange Carrier (IC) designated by the OMNCS as a GETS-ACR designated IC. GETS-ACR Access is available in the entire Telephone Company service area. The GETS-ACR 710 non-geographical NPA code will be opened in all areas serviced by the Telephone Company.

GETS-ACR allows the GETS universal access number 710-NCS-GETS or 1 plus the GETS access number, to be treated uniquely within the public network. GETS-ACR routes the call alternately to three pre-selected Interexchange Carriers (ICs), identified by their Carrier Identification Codes (CICs). Calls are routed based on a predetermined sequence:

- Primary IC
- Alternate IC
- Second Alternate IC

GETS-ACR facilities are designed to be used only for emergency government telecommunications and for testing of government emergency systems and may not be used by unauthorized end users. The Telephone Company will work cooperatively with the customer to provide service at the customer's request where facilities are available. In cases where facilities are not available, the Telephone Company will provide service to the customer as soon as reasonably possible.

(A) Rates and Charges

		Monthly USOC	Nonrecurring Rate	Charge
GETS-ACR Code Activation				
- per end office	ARFPE	\$30.00		\$1,000.00
GETS-ACR Rearrangement

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)

10.9 Specialized Service and Arrangements (Cont'd)

10.9.2 Government Emergency Telecommunications-Alternate Carrier Routing Service (GETS-ACR) (Cont'd)

10.9.2.1 GETS-ACR Calling Party Number (CPN) Feature

(A) Description

Calling Party Number (CPN) modifies the call detail information from the originating calling party number to the universal GETS access number 710-NCS-GETS. It is the universal GETS access number, not the actual calling party number that is passed to the Interexchange Carriers (ICs). The capability to activate and deactivate this feature will be provided. The Telephone Company will deploy CPN where technically available.

(B) Rates and Charges

	<u>USOC</u>	<u>Nonrecurring Charge</u>

Government Emergency Telecommunications Service High Probability of Completion/Enhanced Automatic Call Routing (GETS HPC/EACR) is an emergency telecommunications service offered by the United States Government Office of the Manager, National Communications System (OMNCS). Access to GETS HPC/EACR provides a greater likelihood that callers using this special arrangement will complete their calls during periods when the Telephone Company network is congested. GETS calls will be marked with a special "high probability of completion" (HPC) designation, which elevates the class of a call above its normal level.

GETS HPC/EACR is available in all end offices and tandem switches in the Telephone Company service area where technically feasible.

GETS HPC/EACR facilities are designed to be used for emergency Federal government telecommunications only and may not be used by unauthorized end users.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS,
(DTS-C)(A) General

Provision of custom designed high bandwidth transmission services for the exclusive use of the Interexchange Carrier (IXC) selected by the Department of Defense's Defense Information Systems Agency (DISA) to provide the Defense Information Systems Network (DISN) in the Continental United States (CONUS). DISN-C (aka: DISN-CONUS, DISN and DTS-C) will provide SONET special access transport between specific customer designated IXC locations and Sonet and asynchronous connections between the IXC locations and DISA end user locations.

DTS-C service is provided pursuant to a contract arrangement, commencing with the tariff effective date, also known as the contract or anniversary date. The services provided are the same as those services described in Sections 7 and 8 of this tariff and are subject to the general regulations of this tariff unless otherwise stated.

(B) Service Components(1) DTS-C Transport Service

DTS-C Transport Services are high bandwidth SONET services (combination of IEF and IBT) in capacities of OC3 and OC3c or OC12 and OC12c provided and rated for four specific routes of concentrated traffic. These routes are between Serving Wire Center(s) of the selected IXC and customer designated locations; specifically they are:

1. ARTNVACK - 2100 Reston Parkway, Reston, VA
2. BLTMDCH - 2606 Carsins Run Rd., Aberdeen, MD
3. PHLAPASL - 460 N 6th St., Philadelphia, PA
4. WASHDCSW - 1133 19th St., NW, Washington, DC

DTS-C Transport Services will be provided and rated in increments of STS3 (155 Mbps). The available Network Interfaces (NIs) are OC3, OC3c, OC12, and OC12c, and are provided as follows:

OC3 to OC3
OC3c to OC3c
OC12 to OC12
OC12c to OC12c

Alternate Serving Wire Center (ASWC) service is a service option available to the IXC for DTS-C Transport Services. With this option the Company will choose a wire center other than the normal serving wire center to serve all of that premises' traffic. Special construction rates will apply when fiber feeder routes and other facilities are not available.

(This page filed under Transmittal No. 23)

Issued: April 13, 2001

Effective: April 28, 2001

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.3 Defense Information Systems Network Transmission Services - CONUS, (DTS-C) (Cont'd)(B) Service Components (Cont'd)(1) DTS-C Transport Services (Cont'd)

Fiber path diversity is not a customer option, but is provided where available without a special guarantee. This feature is described in Section 8.

(2) DTS-C Delivery Services

DTS-C Delivery Services are SONET and asynchronous transmissions that provide distribution throughout the network except for the four specific concentrated routes listed above. DTS-C Delivery Services are provided in capacities of OC12, OC12c, OC3, OC3c, DS3 and DS1. Also available for OC3, OC3c, OC12, and OC12c as a service option is Four Fiber 1 + 1 Port Protection. These services are provisioned the same as Special Access DS1 and DS3 services, and IntelliLight Broadband Transport (IBT) services, described in Sections 7 and 8 respectively, except that DTS-C rate plans apply.

Any current optional feature for these services will be provided at the standard tariff rates.

(C) Terms and Conditions

- (1) The contract/commitment period for DTS-C is 3 years and may be renewed twice in 3-year increments for a maximum of nine years. The contract renewal will be at the same or lower rates.

Renewal for a third 3-year period will result in a 15% discount applied to the monthly recurring rates for all SONET DTS-C Transport and Delivery Services. The discount will apply for the duration of the 3-year extension for these SONET services. The discount for the first 24 months of the new 3-year commitment period will be calculated using the rates in effect on the day the contract was renewed, and it will be applied as a lump sum adjustment to the customer's bill no later than the first bill period following the date of renewal. Beginning on month 25 and continuing through the end of the commitment period, the discount will be applied as a monthly adjustment to the customer's bill.

10.9 Specialized Services and Arrangements (Cont'd)

10.9.3 Defense Information Systems Network Transmission Services - CONUS, (DTS-C) (Cont'd)

(C) Terms and Conditions (Cont'd)

- (2) Any nonrecurring charges applicable for this service are guaranteed not to exceed \$1.00 for the life of the contract including renewal life.
- (3) Any rearrangements of services will be treated as disconnects and new connects.
- (4) DTS-C services are not subject to any Special Access Service Guarantee credits, but are subject to the standard credits for service outages as described in Section 2 of this tariff.
- (5) The DTS-C IXC is not subject to termination liability in the first year of the contract, nor for any services disconnected at the request of DISA during the life of contract.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)

10.9 Specialized Services and Arrangements (Cont'd)

10.9.3 Defense Information Systems Transmission Service - CONUS, (DTS-C) (Cont'd)

(C) Terms and Conditions (Cont'd)

- (6) DTS-C services are subject to termination liability in years 2 and 3 of the initial/base contract period and in years 1 through 3 for each renewal period. Termination liability is separated by service categories, i.e., Delivery and Transport.

Termination liability for DS1 and DS3 Delivery Services is based on maintenance of a commitment level of 65% of 100% of the DS1 equivalency for all DS1 and DS3 services in place at the end of Year One. Year One is the first year of the base contract period and ends on January 27, 1998. Anytime that a delivery service is disconnected after Year One, termination liability will be equal to 6 months revenue for the total quantity of DS1 equivalent services which fall below the 65% level quantified at the end of Year One.

Termination liability for SONET Delivery Services and all Transport Services is equal to 15% of the recurring monthly charges remaining in the contract period; i.e., a maximum of 24 months revenue in the base contract period or 36 months revenue in either renewal contract period.

- (7) In the event that a SONET DTS-C service is disconnected within the first 24 months of the third 3-year contract period, the customer will be billed the pro-rated portion of the lump sum adjustment as described in (C) (1) preceding from the date of disconnection through the balance of the initial 24 months. This is in addition to any termination liability that may be applied under the terms and conditions of this contract.

(D) Rate Elements

(T)

(1) DTS-C Transport Service

(M)

DTS-C Transport service has three rate elements, terminations, ports, and per mile mileage. Each rate element is discounted based on quantity. The discounts on ports and terminations are based on the quantity per location. Terminations are provided and rated in increments of STS3. OC3/OC3c and OC12/OC12c ports are provided and rated per increment of STS3 over the interface. Mileage is rated per mile for the distance between SWCs and/or ASWCs of the designated locations.

(2) DTS-C Delivery Services

The delivery service rate elements are terminations, ports, and mileage, fixed and per mile, for the SONET services. Channel terminations and fixed and per mile mileage rate elements are applicable for the asynchronous DS1 and DS3 services. Detailed explanations of these basic service rate elements are provided in Sections 7 and 8.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.4 Defense Protection Service (DPS)(A) Description

Provision of a custom designed surveillance video network for an agency of the Department of Defense. The network will cover 26 locations within the Washington, D.C. (236) LATA.

The network service consists of video and data transport over fiber facilities between 25 locations and the DPS Control Center located in the Pentagon. This service allows the transport of simplex video and duplex data across a single fiber to and from each location. The network component provides FM video with bi-directional data; thus allowing the DPS Control Center the ability to control the pan, tilt and zoom functions of its video equipment at each location.

The customer is responsible for providing compatible equipment at each location.

The commitment period for this service is five years.

10.9.5 Washington Interagency Telecommunications System 2001

(A) General

Washington Interagency Telecommunications System 2001 (WITS 2001) is a uniquely rated and designed data telecommunications switching and transport service arrangement for the General Services Administration (GSA). WITS 2001 provides specific Special Access and Packet Data services (i.e., Dedicated Transmission Services DTS), Frame Relay Service (FRS), Asynchronous Transfer Mode - Cell Relay (ATM), and Switched Multi-megabit Data Service* (SMDS). WITS 2001 is designed for the exclusive use of GSA, various federal agencies, and other designated end users, and provides transmission services between and among them and their designated interexchange carriers and/or information service providers. (C)

(B) Terms and Conditions

WITS 2001 is provided pursuant to an eight-year contract arrangement (a four-year base period and four one-year options), commencing with the tariff effective date (a.k.a., anniversary or contract date). This tariff states first year rates and will be amended to state rates for succeeding years on or before expiration of the first anniversary date. Except as otherwise stated in this section, the services provided are the same as those services described in Sections 7, 8 and 16 of this tariff. The services are subject to the general regulations of this tariff unless otherwise stated.

* Effective January 1, 2002, this service will no longer be available to new Customers. New subscriber network interfaces for existing SMDS customers will not be available effective January 1, 2002. Existing SMDS Customers are also limited to current in-place facilities effective January 1, 2002. Transfers to new service locations or upgrades to existing subscriber network interface access connections will not be available effective January 1, 2002. (N)

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.5 Washington Interagency Telecommunications System 2001(C) Service Components(1) Dedicated Transmission Services (DTS)

DTS provides a fiber-based network of special access point-to-point transmission paths of various bandwidths. The analog and digital transmissions provided are listed below with the standard special access name in parenthesis if different.

- Analog 4 kHz (voice grade)
- Subrate DSO: 4.8, 9.6, & 19.2 kbps (DDS)
- DSO: 56 & 64 kbps (DDS)
- T1: 1.544 Mbps (DS1)

Channelized: 24 separate 64 kbps channels, where each channel is either clear or subrated.

Unchannelized: a channel with an information payload of 1.536 Mbps.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.5 Washington Interagency Telecommunications System 2001 Cont'd)(C) Service Components (Cont'd)(1) Dedicated Transmission Services (DTS) (Cont'd)

- T3: 44.736 Mbps (DS3)

Channelized: 28 separate DS1 channels of 1.536 information payload.

Unchannelized: a signal with 43.008 Mbps of information payload.

- OC3: a SONET service with a line rate of 155.520 Mbps.
- OC3c: a SONET signal with an information payload rate of 148.608 Mbps.
- OC12: a SONET service with a line rate of 622.080 Mbps.
- OC12c: a SONET signal with an information payload rate of 594.432 Mbps.

DTS has several optional features:

a) Multipoint Connection Features

- Branch-Off (a.k.a., Drop-and-Continue or Multipoint Bridging/Polling): permits a primary station to communicate with two or more subtending stations and allows for broadcast polling of up to 40 analog and 16 digital DSO channels at a Wire Center hub. It is available for DSO 4-wire digital, 4-wire analog and 2/4-wire analog voice circuits of the same type and speed.
- Drop and Insert (a.k.a., Add Drop Multiplexing): provides DS1, DS3, OC3 and OC12 drop and insert. Grooming capability of 1/0 and 3/1 is provided at designated wire center hubs.

b) Service Assurance

This feature provides for service guarantees of 99.98% availability, trouble identification within 20 minutes, and a time to restore out-of-service conditions in less than 2 hours in 99.95% of the cases. It covers the transmission path but not the optional features, such as multiplexing.

(D) Rate Applications

The WITS 2001 services are uniquely rated to meet GSA requirements. In addition, the service components and rate elements are rated based on specific NPA NXX areas (wire center serving areas with in a Numbering Plan Area). These rate groups are described below:

Group 1: services provided by the Metro, Midtown and Southwest switching/wire centers and the subtending remotes located in the District of Columbia.

Group 2: services provided by all of the remaining Central Offices (COs) in the District of Columbia not in Group 1.

Group 3: services provided by the Silver Spring switch and its subtending remotes located in Rate Area 1 (Rate Areas are as listed in the contract and are particular geographic areas within the rate groups as defined here) in Maryland.

Group 4: services provided by any remaining COs in Rate Area 1 in Maryland not listed in Group 3.

Group 5: services provided by any COs within Rate Area 2 in Maryland.

Group 6: services provided by any CO within Rate Area 3, Charles County, Maryland.

Group 7: services provided by any CO within Rate Area 4, St. Mary's, Maryland.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.5 Washington Interagency Telecommunications System 2001 (Cont'd)(D) Rate Applications (Cont'd)

Group 8: services provided by Arlington and Barcroft switching centers and the subtending remotes in Virginia in Rate Areas 5 & 6.

Group 9: services provided by the remaining COs in Virginia in Rate Area 5 not listed in Group 8.

Group 10: services provided by the remaining COs in Virginia in Rate Area 6 not listed in Group 8.

Group 12: services provided by a CO in LATA 238 in Maryland and connected to the WITS 2001 network via a designated Interexchange Carrier (IXC).

Group 14: services provided by a CO in LATA 246 in Virginia and connected to the WITS 2001 network via a designated IXC.

Group 15: services provided by the Pentagon wire center and the Navy Annex Optical Remote Module.

(N)
(N)

The WITS 2001 rate elements are very similar to those for the generic services described in other sections of this tariff. Following is a list by service type of the WITS 2001 rate elements. Full descriptions are provided when the rate element/service is unique to WITS 2001 or different from those in the generic offering:

(1) Dedicated Transmission Services (DTS)

Local Access: same as a Special Access Channel Termination but billed by rate group for the terminating and originating locations. This service element has a one-time charge for installation and a monthly recurring charge. Other nonrecurring charges may apply for other service activities.

Material formerly shown on this page now appears on Page 10-37.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)10.9 Specialized Services and Arrangements (Cont'd)10.9.5 Washington Interagency Telecommunications System 2001 (Cont'd)(D) Rate Applications (Cont'd)(1) Dedicated Transmission Services (DTS) (Cont'd)

Local Transport: has both a fixed and per mile element that equates to Special Access Mileage. Both per mile and fixed has a monthly recurring rate.

Branch-Off Multipoint: covers the optional service feature described in Section C preceding. A one-time charge for installation and/or a monthly recurring charge may be applicable. Other nonrecurring charges may apply for other service activities.

Drop & Insert Multipoint: covers the optional service feature described in Section C preceding. A one-time charge for installation and/or a monthly recurring charge may be applicable. Other nonrecurring charges may apply for other service activities.

Service Assurance: covers the optional service feature described in Section C preceding. It is charged per Local Access rate element, and may have a one-time charge for installation and/or a monthly recurring charge. Other nonrecurring charges may apply for other service activities.

In addition to an installation charge, many of the WITS 2000 services also may be subject to three other one-time nonrecurring charges (NRCs). They are:

Cancellation Charge: this charge may be incurred when a service or optional feature is cancelled within one week of the scheduled due date.

Disconnect Charge: this charge may be incurred when a service or an option feature is completely removed/disconnected.

Hard Change Charge: a charge that may be incurred when a change in service requires the dispatch of a technician to the customer's site to make changes in facilities or equipment; e.g., a service is moved from one location to another.

ACCESS SERVICE

10. Special Federal Government Access Services (Cont'd)

10.9 Specialized Services and Arrangements (Cont'd)

10.9.6 FAA Telecommunications Infrastructure (FTI)

(N)

(A) General

The FAA Telecommunications Infrastructure (FTI) is a uniquely rated and designed program providing certain Special Access services for the Federal Aviation Administration (FAA), with Harris Corporation as agent for the FAA. FTI provides Voice Grade Service, Digital Data Service, High Capacity Services (DS1 and DS3), and IntelliLight Broadband Transport (IBT).

(B) Terms and Conditions

- (1) FTI is provided pursuant to a five-year contract and may be renewed up to ten times in one-year increments. The service will continue until terminated for up to a 15-year period.
- (2) Except as otherwise stated in this section, the services provided are the same as those services described in Sections 7 and 8 preceding of this tariff. The services are subject to the general regulations of this tariff unless otherwise stated.
- (3) FTI is available from every wire center in all operating territories under this tariff, subject to the availability of suitable facilities.
- (4) FTI allows connectivity to other Telephone Company services and to any other Interexchange Carrier point of presence (POP) through Collocated Interconnection as described in Section 19 following.
- (5) The rates and charges for FTI are specified in (C) following and apply in lieu of the rates, charges and term plans specified in Sections 7 and 8 for the specific service involved
- (6) Service connections will utilize the following Network Channel Interface codes.

<u>Service</u>	<u>NC</u>	<u>IXC POP TO</u>	<u>End User</u>	<u>End User to</u>	<u>End User</u>
		<u>NCI</u>	<u>SECNCI</u>	<u>NCI</u>	<u>SECNCI</u>

(C) Rates and Charges

For each service provided under FTI, the following rates and charges apply.

	<u>USOC</u>	<u>Monthly Rate</u>	<u>Nonrecurring Charge</u>
(1) <u>Voice Grade Service</u>			
(a) <u>Channel Termination</u> Per point of termination			
- Four Wire		\$44.10	\$1.00
(b) <u>Channel Mileage</u> Over 0 Mileage Band			
- Fixed		14.00	
- Per Mile		.35	
(2) <u>Digital Data Service</u>			
(a) <u>Channel Termination</u> Per point of termination			
- 64 Kbps		66.50	1.00
(b) <u>Channel Mileage</u> Over 0 Mileage Band			
- 64 Kbps Fixed		47.50	
- 64 Kbps Per Mile		1.90
