FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA11.1 General

This section covers FIA that are provided for use only by agencies or branches of the Federal Government and other users authorized by the Federal Government. FIA provided to state emergency operations centers are included. These FIA provide for command and control communications, including communications for national security, emergency preparedness and presidential requirements. They are required to assure continuity of Government in emergency and crisis situations and to provide for national security.

FIA for command and control communications and for national security and emergency preparedness are sometimes required within a short time frame. These provisions are especially needed to meet presidential requirements or in response to natural, man made, or declared emergencies. Requirements of this type cannot be forecasted and are usually needed for a relatively short period. The provision of FIA under these conditions may require the availability of facilities, such as portable microwave equipment, etc., which are provided on a temporary basis.

11.2 Emergency Conditions

These FIA will be provided on the date requested or as soon as possible thereafter when the emergency falls into one of the following categories:

State of crisis declared by the National Command Authorities (includes commitments made to the National Communications System in the "National Plan for Emergencies and Major Disasters").

Efforts to protect endangered U.S. personnel or property both in the U.S. and abroad (includes space vehicle recovery and protection efforts).

Communications requirements resulting from hostile action, a major disaster or a major civil disturbance.

The Director (Cabinet level) of a Federal Department, Commander of a Unified/Specified Command, or Head of a Military Department has certified that a communications requirement is so critical to the protection of life and property or to the National Defense that it must be processed immediately.

Political unrest in foreign countries which affect the National Interest.

Presidential Service.

11.3 Intervals to Provide FIA

ASRs may be placed under the provisions set forth in 3.2.1 preceding.

11.4 (Reserved for Future Use)

(This page filed under Transmittal No. 25.)

Director - Tariffs
600 Hidden Ridge, Irving, Texas 75038

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.5 Safeguarding of FIA

11.5.1 (Reserved for Future Use)

11.5.2 FIA Availability

In order to insure communications during periods of emergency, the Telephone Company will (within the limits of good management) make available the necessary facilities to restore FIA in the event of damage or to provide temporary emergency FIA.

In order to meet the requirements of agencies or branches of the Federal Government, the Telephone Company may utilize Government-owned facilities, when necessary, to provide FIA.

11.6 Federal Government Regulations

FIA provided to the Federal Government will be billed in arrears, as required by Federal procurement or disbursement regulations, or as established by law. ICs providing service to the Federal Government are not entitled to the benefits of those laws or regulations providing for billing the Federal Government in arrears.

11.7 (Reserved for Future Use)

11.8 FIA Offerings to the Federal Government

The following FIA are provided only for agencies or branches of the Federal Government. Access Services provided to the Federal Government but not specified in the following will be provided in accordance with the regulations and at the rates contained in other sections of this tariff.

11.8.1 Type and Description(A) Voiceband Special Access(1) Voice Grade Secure Communications Type I (USOC - GOV1X)

Approximate bandwidth of 10-50000 Hz. Furnished for two-point secure communications on two-wire or four-wire metallic facilities between two or more customer designated locations and an end user's premises. Special Access is conditioned as follows:

T-3 Conditioning - The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

15 dB at 10 Hz
13 dB at 100 Hz
12 dB at 1000 Hz
20 dB at 10000 Hz
30 dB at 50000 Hz

(This page filed under Transmittal No. 25.)

Director - Tariffs
600 Hidden Ridge, Irving, Texas 75038

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(A) Voiceband Special Access (Cont'd)(1) Voice Grade Secure Communications Type I (Cont'd)

Additional conditioning (available in one or two directions on four-wire facilities only) to provide the following characteristics:

The absolute loss (referenced to one milliwatt) with respect to frequency shall not exceed:

- 0 dB at 1000 Hz
- + 1 dB between 1000 Hz and 40000 Hz
- + 2 dB between 10 Hz and 50000 Hz (+ means more loss)

The net loss of the conditioned Special Access (with or without additional conditioning) shall not vary by more than 4 dB at 1000 Hz from the levels specified above. Voice frequency signaling or supervisory tones can be transmitted.

(2) Voice Grade Secure Communications Type II (USOC - GOV2X)

Approximate bandwidth 10-50000 Hz. Furnished on four-wire metallic facilities for duplex operation for two-point secure communication between a customer designated location and an end user's premises. Special Access is conditioned as follows:

G-1 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same as Voice Grade Secure Communications Type I Special Access without additional conditioning. Voice frequency signaling or supervisory tones can be transmitted.

(3) Voice Grade Secure Communications Type III (USOC - GOV3X)

Approximate bandwidth 10-50000 Hz. Furnished on four-wire metallic facilities for duplex operation for two-point secure communication between a customer designated location and an end user's premises. Special Access is conditioned as follows: G-2 Conditioning - The absolute loss with respect to frequency and the net loss variation from the customer designated location to the end user's premises shall be the same as Voice Grade Secure Communications Type I Special Access without additional conditioning; and from the end user's premises to the customer designated location shall be the same as Voice Grade Secure Communications Type I Special Access with additional conditioning. Voice frequency signaling or supervisory tones can be transmitted.

(This page filed under Transmittal No. 25.)

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(A) Voiceband Special Access (Cont'd)(4) Voice Grade Secure Communications Type IV (USOC - GOV4X)

Approximate bandwidth 10-50000 Hz. Furnished on four-wire metallic facilities for duplex operations for two-point secure communications between two customer designated locations. Special Access is conditioned as follows:

G-3 Conditioning - The absolute loss with respect to frequency and the net loss variation shall be the same in both directions of transmission as Voice Grade Secure Communications Type I Special Access with additional conditioning. Voice frequency signaling or supervisory tones can be transmitted.

(B) Special Wideband Digital Special Access

Special Access arrangements for secured communications to accommodate the transmission of binary digital baseband signals in a random polar format.

(1) Wideband Secure Communications Type I (USOC - GW1++)

For transmission at the rate of 18,750 bits per second.

(2) Wideband Secure Communications Type II (USOC - GW2++)

For transmission at the rate of 50,000 bits per second.

(3) Wideband Secure Communications Type III (USOC - GW3++)

To accommodate the transmission of restored polar two-level facsimile signals with a minimum signal element width of 20 microseconds at a rate of 50,000 bits per second.

To accommodate the transmission of binary digital baseband signals in a random polar format at the rate of 50,000 bits per second.

(C) Federal Payment Plan (FPP) - DS1/DDS/Four-Wire Voiceband/DS3(1) Description

The Federal Payment Plan (FPP) - DS1, DDS, Four-Wire Voiceband or DS3 service will be provided to the Federal Government or any customer awarded a contract, with a minimum three year period, to provide telecommunications service(s) for the exclusive use of the Federal Government and its authorized agents. The FPP will allow each of the Federal Government's authorized customers providing network services under contract to obtain DS1, DDS, Four-Wire Voiceband and DS3 SALs at rates contained in this section. FPP DS3 services will be filed under 11.8.3(D) on an Individual Case Basis (ICB). In addition to the specific terms and conditions of this plan, all other regulations in Section 5 pertaining to DS1, DDS, Four-Wire Voiceband and DS3 services are applicable. For Special Transport associated with DDS and Four-Wire Voiceband FPP services, the RSP monthly recurring charges set forth under Section 5.7.16(A) will apply, as follows. For a three year FPP term, the three year RSP transport rate is applicable. For either the five year or six to fifteen year terms, the five year RSP transport rate will apply. All other associated rate elements or additional features are available at the tariffed rates and regulations. Special construction may apply as specified in Section 10.

(This page filed under Transmittal No. 25.)

Issued: April 17, 2001

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(C) Federal Payment Plan (FPP) - DS1/DDS/Four-Wire Voiceband/DS3 (Cont'd)(2) FPP Enrollment

At enrollment, unless the customer of record is the Federal Government, the customer will provide in writing, a description of the Federal Government contract, a forecast of services desired, and a term ending date which may be three years, five years or six years not to exceed 15 years. If the option of six to fifteen years is chosen, the ending date must be the same as the government contract ending date.

(3) Adding Services to the Plan

Except for FPP DS3 service which is provided on an ICB basis, the customer may add DS1, DDS or Four-Wire Voiceband services to the plan at any time during the term of the FPP. The services added will have the same term ending date.

(4) Rebid Provision

If as a result of a Federal Government contract rebid provision any DS1, DDS or Four-Wire Voiceband services under an FPP are discontinued by the customer as a direct result of the rebid process, termination liabilities will not apply.

(5) Mandated Site Closing

If, as a result of a Federal Government mandated site closing, any DS1, DDS, Four-Wire Voiceband, or DS3 services under the FPP are discontinued, termination liabilities will not apply.

(6) CDL Change

In the case where the government agency(s) at a current CDL chooses or is ordered to move to a new CDL, and the new CDL requires the same or more DS1, DDS or Four-Wire Voiceband services, no termination liabilities will apply.

(7) Change in Term

Should the Federal Government extend their contract and the customer wants to extend the FPP to match the new contract, the customer shall provide written notice to the Telephone Company. The Telephone Company will extend the ending date to match the new contract date. If the term ends and the customer does not provide us with a new ending date within 90 days, the rates will be converted to the standard month-to-month rates. The same term originally established will be used when applying rates unless the customer qualifies for longer term rates based on the remaining life of the term.

(8) Multiple Contracts

Each customer that has contracts with the Federal Government may have multiple contracts and a different ending date for each Federal Government contract.

(This page filed under Transmittal No. 25.)

Issued: April 17, 2001

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)

11.8 FIA Offerings to the Federal Government (Cont'd)

11.8.1 Type and Description (Cont'd)

(C) Federal Payment Plan (FPP) - DS1/DDS/Four-Wire Voiceband/DS3 (Cont'd)

(9) Upgrade to Higher Speed Service

The customer may choose to upgrade service to a higher speed during the FPP period. The upgraded service will be subject to all appropriate NRCs. If the term selected for the higher speed service extends for a longer period than the remaining time of the FPP or seven years if there is more than seven years remaining on the FPP, no termination liabilities will apply.

(10) Termination Liabilities

Except for FPP DS3 service, when an FPP service is discontinued prior to the end of the period, termination liability charges will apply based on the remainder of FPP period and the date of the disconnect. The termination liability rates shall be as follows:

<u>Year in Which Service is Discontinued</u>	<u>Liability Rate</u>
1 - 3	20%
4 - 15	10%

(11) NRCs

There will be no nonrecurring charges for DS1 SALs ordered for FPP services, however, nonrecurring charges in Section 5 pertaining to DDS, and Four-Wire Voiceband services will apply for installation of new DDS and Four-Wire Voiceband SALs. The NRC associated with an ICB for FPP DS3 services will be filed under 11.8.3(D).

(12) Rate Changes

The FPP rates will be at or below the TPP rates if TPP is available in Section 5. The 6 to 15 year FPP rate will be less than the 5 year FPP rate.

(D) Government Emergency Telecommunications Service (GETS)

- (1) The Government Emergency Telecommunications Service (GETS) provides authorized federal government end users with a nationwide security and emergency preparedness (NS/EP) switched voice and data communications service utilizing the public switched network, through the activation of a special code(s) in the Telephone Company's end office and tandem office switching systems, as requested by the Federal Government or its authorized agent. The implementation fee is set forth under 11.8.3(H)(1).

(This page filed under Transmittal No. 25.)

Director - Tariffs

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(D) Government Emergency Telecommunications Service (GETS) (Cont'd)

- (2) Alternate Carrier Routing (ACR) is an advanced network feature, available for GETS in suitably equipped offices, which allows NS/EP users to utilize the public switched network to provide enhanced call completion capability on calls made during times of national emergencies or disaster. ACR provides alternate route capability on calls originated from lines served by end offices equipped with the ACR feature to the GETS universal access number. With ACR, these calls will first be routed for completion to the presubscribed carrier of the originating line, when the presubscribed carrier is a participating GETS interexchange carrier. When the call cannot be successfully routed to the first (presubscribed) GETS carrier, an alternate attempt will be made to route the call to a second and, if necessary, a third participating GETS carrier. The second and third alternate GETS carriers are preselected on a per end office basis by the government or its authorized agent.

Rates for ACR are set forth under 11.8.3(G)(2).

- (3) High Probability of Completion (HPC) is a set of enhanced features, available for GETS in suitably equipped offices, which improves the probability of the completion of GETS traffic via the Public Switched Telephone Network (PSTN) during times of national emergencies or disaster, when the PSTN is congested due to heavy traffic or damage to the network. HPC provides the capability to set a special indicator, based on a specific 3, 6, or 10 digit dialed number string, specified by the government, that is carried through the network via SS7 signaling and will indicate that the call is a GETS call. Typically, the digit string of 710 will be used to set the HPC indicator. This capability is not offered on toll free numbers such as 800 or 888 numbers.

The HPC feature set also provides the capability to queue calls marked with the HPC indicator on outgoing trunk groups and to exempt them from certain restrictive Network Management Controls. The ability to provide traffic data on both a trunk group level and a central office level is also included.

Rates for HPC are set forth under 11.8.3(G)(3).

(This page filed under Transmittal No. 25.)

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(E) Switched Data Service

(1) Switched 56

This option provides for a connection capable of up to 56 Kbps digital transmission between the customer's DDL and a technically capable end office. Switched Data service lines connected at those technically capable end offices will be accessed on a switched basis for digital transmission up to 56 Kbps. These locations are identified in the National Exchange Carrier Association, Inc., Tariff F.C. C. No. 4 Wire Center and Interconnection Information.

This option is provided only with FGD or BSA-D as set forth in Section 4. This trunk group requires the use of a DS1 digital interface as described in Section 4.2.3(B)(6).

Access is made via the standard dialing pattern as set forth in Section 4.2.1(D)(8).

(2) Switched 64

This option provides for a connection capable of up to 64 Kbps digital transmission with clear channel capability between the customer's CDL and a technically capable end office. Clear channel capability allows for full bandwidth availability to the customer with no part of the channel used for control, framing or signaling.

Switched 64 requires all digital facilities including the use of DS1 digital interface as described in Section 4.2.3(B)(6) and is available only with FGD or BSA-D, as set forth in Section 4, from end offices capable of providing SS7 signaling. Bipolar with Eight Zero Substitution (BBZS) line code format and Integrated Services Digital Network (ISDN) or other Switched Data based services. These locations are identified in the National Exchange Carrier Association, Inc. Tariff F.C.C No. 4 Wire Center and Interconnection Information.

Access is made via the standard dialing pattern as set forth in Section 4.2.1(D)(8) and 4.2.2(D)(8).

(This page filed under Transmittal No. 25.)

Director - Tariffs
600 Hidden Ridge, Irving, Texas 75038

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.1 Type and Description (Cont'd)(F) Banded Optical Transport

Banded Optical Transport provides transport between the serving wire center of the interexchange access customer's location and the access customer's end user premises. Banded Optical Transport may be provided at DS0, DS1, DS3, OC3, E1, STS1, STM1 or OC12 bandwidth levels as required by the customer. Wholly provided Banded Optical Transport may also be provided at OC3c and OC12c bandwidth levels. When Banded Optical Transport is ordered at a DSO level, the customer must request a minimum of a DS1 interface at the IC customer wire center and will be charged for the appropriate rider (i.e., DS1 or DS3). Banded Optical Transport is provided with a service guarantee as shown in 2.4.4(A)(8). For subscription to Banded Optical Transport, the customer must have an accumulative demand requirement equivalent to an average of nine DS3s, i.e., 5,978 channels, per LATA. The bandwidth will be reviewed annually at a mutually agreed upon date by the customer and the Company. An allowance of minus 2% will be considered as having met the commitment level. Should the bandwidth fall below minus 2%, the customer will have thirty (30) days to meet the bandwidth requirement. If not met, the customer will be notified by the Telephone Company and will be required to convert from Banded Optical Transport to another Incremental SONET Transport option as shown in Section 20.

Banded Optical Transport is provided at a flat-rated monthly charge for one (1) year, three (3) year, five (5) year or six to fifteen (6 to 15) year contract periods at the rates shown in 11.8.3(J). The rates for Banded Optical Transport are in addition to the appropriate rate elements as shown in Section 20. The contract period for Banded Optical Transport cannot exceed the contract period of the Connect. Banded Optical Transport includes the special access line from the end user serving wire center to the end user premises, for both on-net and off-net. Banded Optical Transport will be provisioned at the highest network facility available at the time of the order. The monthly rate will be determined based on the mileage between the serving wire centers of the customer designated locations and is applicable on a per circuit basis. Mileage will be rounded up to the next whole mile except when the CDLs are collocated.

Banded Optical Transport may be ordered as switched or special access.

Rate regulations for Banded Optical Transport are as shown in 20.3(F).

11.8.2 Mileage Application

Mileage for rate application is the airline distance measured between the two related Special Access terminating points (i.e., customer designated location and end user premises).

11.8.3 Rates and Charges

Notification will be made to the FCC that Special Federal Government FIA will be provided in accordance with Special Permission No. 83-867.

(A) Voiceband Special Access

The provision of T-3 and G conditioned Special Access contemplates station and tandem switching operations using customer provided equipment, as well as Special Access. Separate narrowband or voice grade Special Access, where required by the customer provided equipment or switching operation, are furnished in accordance with the applicable sections of this tariff.

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)11.8 FIA Offerings to the Federal Government (Cont'd)11.8.3 Rates and Charges (Cont'd)(E) Move Charges

When a Special Access requiring T-3 conditioning, T-3 additional conditioning, or a Special Access requiring G conditioning as set forth in (A) preceding, is moved to a different building, the nonrecurring charge applies; when moved to a new location in the same building, a charge of one-half the nonrecurring charge applies.

When any FIA for which a termination charge is specified is moved and is installed at a new location the customer may elect:

- (1) to pay the unexpired portion of the termination charge for the FIA, if any, with the application of a nonrecurring charge and the establishment of a new termination charge for such FIA at the new location, or
- (2) to continue the FIA subject to the unexpired portion of the termination charge, if any, and pay the estimated costs of moving such FIA, provided that the customer requests these charges be quoted prior to ordering the FIA move. Charges for moving such FIA will be based on estimated costs attributable to the move.

Move charges include the estimated costs of removal, restoration of FIA necessitated by the move, transportation, storage, reinstallation, engineering, labor, supervision, materials, administration, taxes, and any other specific items of cost directly attributable to the move.

FACILITIES FOR INTERSTATE ACCESS

11. SPECIAL FEDERAL GOVERNMENT FIA (Cont'd)

11.9 Specialized Services and Arrangements (Cont'd)

(N)

11.9.1 Washington Interagency Telecommunications System 2001

(A) General

Washington Interagency Telecommunications System 2001 (WITS 2001) is a uniquely rated and designed data telecommunications switching and transport service arrangement for the General Services Administration (GSA). WITS 2001 provides specific Special Access (i.e., Dedicated Transmission Services DTS). WITS 2001 is designed for the exclusive use of GSA, various federal agencies, and other designated end users, and provides transmission services between and among them and their designated interexchange carriers and/or information service providers.

(B) Terms and Conditions

WITS 2001 is provided pursuant to an eight-year contract arrangement (a four-year base period and four one-year options), commencing with the tariff effective date (a.k.a., anniversary or contract date). This tariff states first year rates and will be amended to state rates for succeeding years on or before expiration of the first anniversary date. Except as otherwise stated in this section, the services provided are the same as those services described in Sections 5 and 20 of this tariff. The services are subject to the general regulations of this tariff unless otherwise stated.

(C) Service Components

(1) Dedicated Transmission Services (DTS)

DTS provides a fiber-based network of special access point-to-point transmission paths of various bandwidths. The analog and digital transmissions provided are listed below with the standard special access name in parenthesis if different.

- Analog 4 kHz (voice grade)
- Subrate DSO: 4.8, 9.6, & 19.2 kbps (DDS)
- DSO: 56 & 64 kbps (DDS)
- T1: 1.544 Mbps (DS1)

Channelized: 24 separate 64 kbps channels, where each channel is either clear or subrated.

Unchannelized: a channel with an information payload of 1.536 Mbps.

(N)

11.9.1 Washington Interagency Telecommunications System 2001 (Cont'd)

(C) Service Components (Cont'd)

(1) Dedicated Transmission Services (DTS) (Cont'd)

- T3: 44.736 Mbps (DS3)

Channelized: 28 separate DS1 channels of 1.536 information payload.

Unchannelized: a signal with 43.008 Mbps of information payload.

- OC3: a SONET service with a line rate of 155.520 Mbps.
- OC3c: a SONET signal with an information payload rate of 148.608 Mbps.
- OC12: a SONET service with a line rate of 622.080 Mbps.
- OC12c: a SONET signal with an information payload rate of 594.432 Mbps.

DTS has several optional features:

a) Multipoint Connection Features

- Branch-Off (a.k.a., Drop-and-Continue or Multipoint Bridging/Polling): permits a primary station to communicate with two or more subtending stations and allows for broadcast polling of up to 40 analog and 16 digital DSO channels at a Wire Center hub. It is available for DSO 4-wire digital, 4-wire analog and 2/4-wire analog voice circuits of the same type and speed.
- Drop and Insert (a.k.a., Add Drop Multiplexing): provides DS1, DS3, OC3 and OC12 drop and insert. Grooming capability of 1/0 and 3/1 is provided at designated wire center hubs.

b) Service Assurance

This feature provides for service guarantees of 99.98% availability, trouble identification within 20 minutes, and a time to restore out-of-service conditions in less than 2 hours in 99.95% of the cases. It covers the transmission path but not the optional features, such as multiplexing.

(N)

11.9.1 Washington Interagency Telecommunications System 2001 (Cont'd)

(D) Rate Applications

The WITS 2001 services are uniquely rated to meet GSA requirements. In addition, the service components and rate elements are rated based on specific NPA NXX areas (wire center serving areas within a Numbering Plan Area). These rate groups are described below:

Group 11: customers served by the Verizon central offices in Prince William County, Virginia.

The WITS 2001 rate elements are very similar to those for the generic services described in other sections of this tariff. Following is a list by service type of the WITS 2001 rate elements. Full descriptions are provided when the rate element/service is unique to WITS 2001 or different from those in the generic offering:

(1) Dedicated Transmission Services (DTS)

Local Access: same as a Special Access Transport and Termination but billed by rate group for the terminating and originating locations. This service element has a one-time charge for installation and a monthly recurring charge. Other nonrecurring charges may apply for other service activities.
