Re: **ET Docket 95-183**

Dear Mr. Caton:

Earlier today, representatives of Loral Space & Communications Ltd. ("Loral") met with Ruth Milkman of the International Bureau to discuss general issues concerning the 37 - 40.5 GHz frequency band. More specifically, Loral discussed the feasibility of a band segmentation approach as a first step toward addressing the needs of various service types planned for use in this band.

Representatives of Loral included Keith R. Barker and Andrew R. D'Uva.

Sincerely,

Andrew R. D'Uva
Counsel for Loral Space & Communications Ltd.
