**RE: ET Docket 95-183**

Federal Communications Commission  
Office of Secretary

Dear Mr. Caton:

On December 4, 1996, representatives of Milliwave, L.P. ("Milliwave") met with Chief of Staff Blair Levin to discuss issues related to the operation of satellite services in the 37 - 40 GHz frequency band. In particular, Milliwave discussed why frequency sharing between satellite and terrestrial operations was not appropriate.

Milliwave was represented by Dennis R. Patrick and Thomas Downey.

Sincerely,

Alex D. Felker  
Executive Vice President
