Subject: RM-9208

I wish to express my opposition to RM-9208, the so-called "LPFM" proposal. This proposal, if enacted, would create a huge regulatory burden for an already over-burdened FCC staff. Thousands of "LPFM" stations would be impossible for the FOB to keep track of. If some of them should choose to operate with excessive power, etc., there would be no way to keep them under control. The FM band is already overpopulated in most of the country, and RM-9208 would just add to the interference. I say NO to RM-9208.
