Susan Fox, Senior Legal Advisor

Subject: Low Power FM / potential problem

It has come to my attention that there exists a potential problem, if the Commission desires to go forward with a Low Power FM proceeding. I am concerned that there could be mass filings of applications for FM translator and/or boosters by existing FM stations, in an attempt to grab a lot of frequencies that could be used for Low Power FM in the future. To prevent this possible speculation, I would request the Commission to impose an immediate "temporary freeze" on all FM translator and booster applications, until after the Low Power FM proceeding is completed. I believe this would best serve the public interest.

Respectfully,

Rodger Skinner

Dear chairman Kennard: i,m glad you are in support of low power broadcasting but i hope that this does not mean minority owned low power station ownership ownly.i hope that the fcc will make it possible for those who are not wealthy(the middle class and economically disadvantaged)to own and operate low power stations.thank you for considering low power broadcasting,which i hope will bring broadcasting back to more local content and,thereby, better serve the local community.best regards, Carl DeWhitt,ki5sf
