M/S #1800-B  
FEDERAL COMMUNICATIONS COMMISSION  
Washington, D.C. 20554

Subject: R M 9208

I am writing at this time to request consideration for a license to operate a low powered FM Station here in Needham, Massachusetts.

The reasons for this request are the needs for localized public affairs activity, news of local interest, and programming for the local populace in this area.

There is a definite need for a local FM Broadcast Service to incorporate all local activities, and to be involved in the local civic events. The present broadcast services do not zero in on local affairs and local civic activities.

The equipment and operation facilities shall comply with all the high standards of technical requirements, as specified by the Federal Communications Commission.

I have had many years of experience on technical staffs of several broadcasting stations, both AM and FM in the New England area.

I thank you for your attention to this request.

Very truly yours,

Maurice B. Polayes, P.E.
