MAR 30 1998

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Christopher Shon White (kiss89fm@aol.com) writes:

I would like to put in my two cents worth concerning the micro broadcasting stations causing the interference on airport frequencies. I fully agree and commend the FCC on its swiftness in informing the micro broadcasters of their interference. And happy to see them comply. If these broadcasters had done their homework they would know their are filters and such that can eliminate the problems. And they should have done so before even attempting such broadcasts. Not doing so was very irresponsible. Also such irresponsibility makes the microbroadcasting Community look bad.

My second comment is on the V Chip. I was under the impression initially that this was gonna be implemented earlier. As a father I feel it will be a great tool, and hope this will be widely available soon.

In closing I would like to say that I have discontinued my Broadcasting for a while. I know of the petitions for rule making in front of the FCC concerning Micro Broadcasting. I am in high hopes of something positive arriving from the petitions. Thanks for your time, and best wishes.

Sincerely,

Shon White
