Dear Chairman Kennard and Commissioners,

Reply comments to the National Association of Broadcasters
Rm 2908

Many of us outside the traditional broadcast industry wholeheartedly agree with the proposal of offering licenses to underserved communities and populations throughout this country of people and communities who would not otherwise be able at today's traditional costs to be able to start - up or buy into nor to purchase an established radio station.

Small community groups, students and citizen activist groups may take advantage of this opportunity should you vote for fairness. We urge you to do so.
