To Whom It May Concern,

I am writing about the possibility of a Low Power FM service becoming a reality. I feel deeply about the RM-9242 and this service being passed. This will help and allow the small broadcaster to have his or her dream completed. I also think that the passing of RM-9242 will give birth to a new dimension in radio. A radio that many radio listeners today can feel more at ease and understand. I only believe that great expectations will form for the radio world brought possible by the passing of RM-9242. Thank you for consideration on this topic.

Thank you,

Alfred Schroeder
