HAVE FCC PASS RM\_9242 LPFM RADIO:

Community Radio Group

You should explain to them that the NAB's claim of interference is a smoke-screen and just not true. Point out to them that there have been 460 full-power FM stations (grandfathered short-spaced stations) operating on 2nd and 3rd adjacent channels for many years, nationwide, with no interference complaints. If these more powerful full-power FM stations don't cause interference using the 2nd and 3rd adjacent channels, then LPFM stations certainly will NOT cause interference either! Likewise no interference will result in the future use of In-Band-On-Channel (IBOC) digital broadcasting. In the FCC Report & Order FCC 97-276, released August 8, 1997, the FCC agreed that the use of the 2nd and 3rd adjacent channels by grandfathered short-spaced full-power FM stations would not cause interference. That's a matter of record that the NAB cannot refute and or denie
