Subject: Free up the air waves!

Dear Chairmen William Kennard:

Let micro-broadcasters have their 100 watts of free speech. Is there any conception or word in your vocabulary for "enough!". Have'nt you given corporate interests ENOUGH of the public's airwaves already. I realize that you and the people that you represent have a great deal of comfort and that you don't want to give that up but COME ON, its not ONLY about your comfort and freedom. Corporate lobbieist, stockholders, media spin-doctors and government officials are not the only people who have a voice with something to say. Let the people have what no one should be without, A VOICE. Give micro-broadcasters their chunk of the electro-magnetic spectrum and you will know that your on the right side of humanity, the one that includes ALL human beings.

I hope that when I say Thank You that I'm not wasting my time.

Kennard  
disappoint us ALL.  
Narzemsky

Thank You William  
Please don't  
Sincerely, Frank
