NOV 13 1998

FEDERAL COMMUNICATIONS COMMISSION  
OFFICE OF THE SECRETARY

This movement is more about freedom of speech than broadcasting but broadcasting is the lynch pin. We are all aware that the commercial broadcast powers (NAB ect) don't want to loose market share. What is at stake here is the freedom of ideas. and broadcasting is the medium of communication.

I believe that the FCC has the responsibility to make as much room as possible for as many voices as possible. While maintaining good engineering practices.

I believe that low power broadcasting should include all stations (FM) under 100 watts ERP.
