From: Mr. Joseph D'Alessandro,
Subject: Pass LPFM Service

Your ***** [another word for copulating] ing ***** the Public Again

Pass LPFM Now!

I know this is a bit off topic, but for those of us that either use Real Audio to listen to transmit over the internet it would have a bearing. Heard on the news this morning that the FCC is once again entertaining thoughts of allowing the local phone companies to charge all "data" calls at Long Distance Rates. If this is approved it would seem to me to completely kill any hopes of internet broadcasting becoming widely accepted, at least for the vast majority of us that don't have access to cable modems. Has anyone else seen anything on this. I know the FCC considered it late last year and decided against it, but apparently the Baby Bells have gotten the FCC to consider it once again. I couldn't find anything new on the FCC site.
