Washington, D.C. 20545

Dear Commissioner:

aa
This letter is to give comment on the proposed licensed Low Power FM stations (MM Docket ~~25~~-25). I am in favor of low power FM stations for smaller towns, communities, universities, small businesses, and diverse populations, such as veterans, minorities and others with interest in starting a community oriented Low Power FM station. These stations could be commercial, educational, nonprofit, or a combination of the three like NPR. The main underpinning is that the "Big Guys" are kept out of this arena. If a person or a group that live in the neighborhood or town in which this station will operate, they should be granted a license to have a Low Power FM station.

The frontiers and opportunities for all our citizens are all but gone. When the little guy is given a chance to start a Low Power FM station then the community and the people of that community benefit. Local stories about the kids in grade school, the church or temple function, bond issues, municipal water quality are stories that links a community. When a FM station caters to this market a need is met, and the people served.

Sincerely yours,

George F. Hilligas
