

I am completley for LPFM.It provides much that conventional stations can`t or won`t.Last summer I was on vacation in a small town here in Texas and there was a horrendous flood.The only news we could get on the flood was on a LPFM station.They stayed on the air throughout the flood giveing out news on where flood waters were etc... When this station is not broadcasting emergency news it serves it`s city by letting any and all political candidates on the air and also lets any polition serving Texas on the air(such as Congressman Ron Paul)
