

I most strongly urge you to implement the licensing of 1000/100/10 watt low power FM micro-broadcasters. These people have as much right to be heard as do your paying friends at the NAB.

I also think that your harassment to date of microbroadcasters, who are not causing interference with others, is wrong and yet another example of a Federal bureaucracy overstepping its authority and encroaching on the rights of the people.

Personally, I agree with Radio Free Vermont; that you have no jurisdiction in intrastate commerce, which most microbroadcasters are. However, licensing microbroadcasters is far better than the mindless harassment and persecution of them that has been taking place.
