

Submitted in support of the low-Power FM Broadcast NPRM.
<http://www.concentric.net/~Radiotv/index.html> document clearly states
my views in the proposal. I am a guy in my 40's, suffering from complications of
diabetes, thus bound to home. I wish to be able
to run a low-power commercial FM station from my home. I am a licensed amateur
NOMTY, and feel I am competent to own and operate
a radio broadcast station in a proper manner, to both serve public interest and
supplement my meager income, as well as have some
fun. So, I submit this as one more citizen in favor of the Low-Power FM Broadcast
Licensing Proposal. Thanks!
