

I am writing to express strong support for a new class of 10 Watt micro broadcasters. My local area is being strangled by media conglomerates which have effectively monopolized the airwaves. I believe that small, community-based radio is important. Democracy cannot exist without freedom of information, and it is important that ordinary citizens be granted equal access to the airwaves -not just multinational corporations such as Disney (which controls a quarter of the FM stations in our local market). I urge you to license low watt radio stations, and to make it easier for ordinary citizens to gain access to the airwaves. Thank you.
