

I am writing in support of the LPFM Radio Service. It is my desire that the LPFM service be adopted to include 1000 watt capacity. Also, since educational institutions already have significant means of communication, I do not believe that they are the best potential for LPFM licensees. The same is true for governmental entities with a significant tax base. Local communities will be best served if LPFM is reserved to those who do not have direct access to the Internet or other major communication media. Citizens groups and non-profit organizations have the greater need. If LPFM were to be completely supported by listeners and local community groups, this would help to prevent overcrowding. It would help to ensure that low power stations be truly used for community oriented purposes.
