

Re: MM Docket 99-25/ Low Power FM

Sirs;

I would like to express my support for the proposed LPFM service. Presently the FM broadcast band is full of cookie-cutter, sound-alike stations that have no real intent in broadcasting 'in the public interest'. The only real interest being served is the bank accounts of a lot of greedy broadcast executives.

A LPFM service would provide a true grass-roots voice for a community. this is lacking on the FM spectrum (with the exception of a very few class operations on the first few channel). It would allow broadcasting truly 'In the Public Interest'.

Thank you for your consideration in this matter.

Richard Via
