

Hello:  
I SUPPORT low power FM.

I am the Chief Engineer at WOLO TV25 in Columbia SC.  
I feel that licensing low power FM would be a GOOD move.  
It will require the operators to operate within spec.'s  
or lose there license, as apposed to the current situation  
of them coming up anywhere they want and not tightly regulating  
there own signal.  
regards, Ed Elser
