

Please pass MM 99-25 and let America have diversity in radio! The plain vanilla corporate approach to radio does not satisfy anyone's needs, except the corporation receiving advertising revenues. I've loved radio since my first transistor carry-along version when I was eight years old; I remember radio plays, and DJ's who put their own programs together; the fine art of segue!! None of that is available anymore. I am saddened by the sameness, from Miami to Los Angeles. There are no more ethnic, geographic, language, or community oriented stations. What a loss. I admire you for even trying to allow this idea to flourish. You must be up against some powerful corporate lobbyists and their lawyers. But thank you for trying.
