

My first comment gave an error message so I'll repeat myself briefly: I would like to see LPFM as a non-commercial alternative to profit and focus group driven corporate radio now on the dial in every city in the country. I would like to see 1-10 Watt service started. I hope that the licenses will be allocated on merit and not by auctioning to the highest bidder. I hope LPFM will be an alternative to the stifling air now so prevalent.
