

We are excited about the opportunities that would come if this proposal is passed. Our interest was first sparked when we noticed a drive-in theater in National City was issuing out small radios that people would listen in their cars while the sound would be sent from a small transmission unit. We want to be able to use this same type setup for interpreting our service in Spanish for those who come to the church from the Spanish Community.

We have a real interest though in setting up a low power community broadcasting station here at our church. Our desire is to broadcast many programs to help people in our community. We would like to have a variety of Christian music and even talk shows, but also various community announcements as in public service announcements. We are in an ideal transmitting location and we would reach a large number of people with services that would benefit their lives. We have a broad base of people from young to old, different cultures and nationalities just within our local community. What a great tool this could be. I emphatically support this measure and would be first in line to put in a request for the opportunity of a low power fm station. Thank you for your time and in allowing me to have a voice in this process.

Daniel P. Lantis, Pastor
First Christian Fellowship Church
