

I ask you to please proceed with the plan to license low power FM facilities. I worked in the industry for ten years, and have seen with my own eyes how national and generic local radio has become. This plan will help to inject some local flavor into the airwaves and will provided needed diversity of opinion, style, background, etc.

I recommend that you make LPFM licenses absolutely exclusive: you can only operate one LPFM station, and LPFM station operators are forbidden from holding any other broadcast licenses.

This will help prevent the genericization of LPFM.

Thank you for your time, and the opportunity to comment via <http>.
