

Dear Ken,

I urge you to support low-power FM stations.

The large AMFM radio companies are NOT serving the public interest.

Recently, in Denver, we lost our wonderful FM classical music radio

station to AM. Yeah, right. Classical music on AM. In 1930 maybe.

Low power stations would be able to offer a more diverse offering

than the corporate behemoths.

Please allow low-power FM stations. It is the only way classical music
will return to Denver on the FM band.

thanks,

dave
