

I am writing on behalf of WCAL in Grand Rapids, MI. I am in favor of the proposal that would grant licenses to low power radio stations. That would help our local college radio station in getting more power broadcast to our local community. Our extremely low powered radio station barely reaches across our campus and this licence would allow us to boadcast over all of grand Rapids. Many poeple like our staion but they are off campus and can not hear it. This license would allow us to reach that target audience. I thank you for the oppurtunity for at least thinking about the new low power license proposal and we hope it will be passed. Thank you for listening to us.
