Re: ECFS Docket # 99-25

Dear Sir/Madam;

This letter concerns the Low Power FM initiative now pending in your docket. It is essential that the FCC amend its laws, rules and regulations to force public radio to act in the best interests of it's listenership. Everyone knows that you can't even listen to the plethora of trash talk and the re-hash of tired old songs that commercial radio foists upon the radio public.

The virtual stranglehold that existing commercial broadcasters have over the entire music industry must be put to an end and this is but a small step. I urge you to level the playing field on behalf of the independent musician and the listener alike by considering and approving the Low Power FM initiative.

**Sincerely,
W.C. Spencer
