

I am really interested in Low Power FM and feel that it is a concept long overdue. Low power FM would really be a godsend here in Omaha as we definitely need a radio voice to serve the African American community here. I applaud the FCC Chairman in trying to make this a reality for people like myself who have ideas and just want to serve the community in which we live. How soon do you think this will be a reality? Thank you for your time.

Sincerely,

Ron Nelson
