

I wish to go on record as being generally in favor of RM-9925 as proposed by the FCC. Considering the recent consolidation of the market, local programming is severely lacking.

It is my opinion that the service should be non commercial. This should insure that licensees are concerned with public service and not profit oriented.

Finally, it is vital that the "micro radio" service be implemented. This is the only valid method of offsetting the consolidation of the commercial broadcasters, and allowing the "voice of the people" to be heard.

These subjects have been covered in masterly detail by other commentors, and I only wish to register my concurrence in a general way. Thank you in advance for your rapid implementation of this much needed new service.

Best Regards,

Robert Gregg
