

As we have seen and noted over the past several months the FCC and the citizens of the United States have endorsed the outright falseified and slanted studies and comments by the council of the NAB. Now that we have proven the statements of the NAB to be nothing more than a way to stall and to put doubt in the minds of the FCC that LPFM can not work I believe the request for another extension shall be looked at in a negitive look toward the FCC and the citizens they represent.

The NAB wants more time for one reason and that is to produce false data scewed to thier personal liking. The NAB track record shows a simple manner of scare-tactics thrown out as facts. The NAB already has a monopoly on broadcasting now and pays indivisiual congressmen millions to support thier monopoly to pad the wallets of a few all while living the citizens of the great country without proper local programming on the air.

The item that does not make sence is "how can the NAB be against LPFM while screaming interferance when transltors have been used by the NAB and its religious followers for years without problems.

Please the facts are in and the citizens have spoken in favor of LPFM overwhelmingly. Lets look at facts and not special interest groups and the lies to benefit a few indivisuals. I submit the FCC DENY THE REQUEST FOR EXTENSION that the NAB has so recklessly put in front of you. The citizens of communities all across this country will benefit from LPFM.
