

As an executive member of our small campus radio station, I believe this low power FM idea that the FCC is considering is excellent, and should be adopted. Hundreds of smaller schools throughout the United States would be able to open a new method of communication with their campuses, providing access to information in a manner efficiently and without the need for anything but a regular FM radio.

I fully support and encourage passage of this proceeding.

Sincerely,

Mike Newcomb, Secretary
WPI Campus Radio Association
WWPI 90.1 FM Cable
Worcester, Massachusetts
