

I wish to offer my support of the creation of a low-power FM service. LPFM will provide persons other than big companies the opportunity to participate in local broadcasting.

I would ask that requirements for application and associated fees be reduced and streamlined.

I ask that 1000 watt LPFMs be licensed to suburban communities that are presently underserved by full-power broadcasters. LPFM will permit new broadcasters to intensely serve the needs and concerns of relatively small communities located near large metro areas.

Thank you.
