

To: FCC Commissioners

I would like to reaffirm my STRONG opposition to any further delays and extensions on FCC Docket 99-25.

I would like to encourage the Commission to APPROVE FCC Docket 99-25 and begin implementation as soon as possible. I believe that the interests of the American public will best be served with the quick and responsible implementation of LPFM.

I am very weary of the ridiculous claims of interference from the NAB and the NPR organizations and the rubber stamping of their comments via their affiliates. I find that competition is really their largest concern. We all deserve equal access to the airwaves and LPFM FCC 99-25 accomplishes that! VOTE YES FOR 99-25!

I find it a disgrace and a disservice for one corporation to control 625 radio stations and for one company to simulcast many stations to make just one for better Arbitron ratings and more revenues.

It is time for the FCC to put an end to these irresponsible individuals and corporations and place radio in the hands of citizens who care about public service and better programming and most of all love radio.

Respectfully submitted,
