

I am a programmer interested in applying for and obtaining a new license once they become available. I am cautiously optimistic that 99-25 will be included in the proceedings, as I feel that is the best way that local programmers can be heard by the audiences only they know best. Audience is lost from radio frequently due to its generic content, and this can best be addressed by local broadcasters. I have formatted both a music station and a community service station in anticipation of the coming proceedings. Please keep me informed. Sincerely, Ron Orenstein 6725 Corie Lane West Hills, CA 91307 ronoren@aol.com
