RE: Docket 99-25 (Low Power FM Radio)

RECEIVED
SEP 21 1999
FCC MAIL ROOM

Dear Engineer-In-Charge

We are a Federal Licensed Communications business, holding license Number
PG-11-24383

Our company has a keen interest for serving customers in need of Low Power FM Broadcast Stations, as referred to in Docket 99-25, 47 CFR 90.242 and 47 CFR 90.20a. There are large and elongated areas that we service such as El Segundo, Malibu and Thousand Oaks to name a few, that are not effectively serviced by TIS AM Radio. Also, nongovernmental entities are in great need of a low power system to reach from one to fifteen miles at varying times of the week. The use of the LPFM system would greatly facilitate a need for "health and safety" as required by section 301 "interests, needs and necessities" of the Communications Act of 1934 as amended.

Sincerely,

Forrest Oden
President
