Subject: **CREATION OF LOW POWER RADIO SERVICE or FM(LPFM)**
MM 99-25 FC-112 Mass Media Bureau

In regard to your consideration of the Creation of Low Power FM Radio Service I would like to make a public comment concerning the issue of existing commercial FM Translator stations.

The existing commercial FM Translator stations should be given the opportunity to convert to one of the Low Power FM Radio Stations if this comes into being. Because they are already fully legal, up and running on an authorized frequency and currently serve the local public with their FM signal. The owner's of these handfuls of stations across America have already invested their time and money, often without remuneration, in the interest of serving the public. It would be demonstratively unfair to ignore their existence and not give them consideration.

The current commercial FM Translators should have the opportunity to apply for and convert to a Low Power FM Radio Station on their currently assigned and authorized frequency.

Sincerely yours,

Leo E. Craven
