RECEIVED

OCT 04 1999

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Greetings Commissioner Kennard,

I am writing to you now about an issue of great importance. It is concerning the FCC's proposal to license Low Power FM radio stations across the nation.

I believe that the Denver Community, as a whole, is in need of access to the airwaves. We are practically controlled by the corporate media with no outlet for ourselves, the people. Now, when I say 'community', I don't mean just sections of the community. One free-form radio station could serve the entire community with diversified programming. We need radio to bring us all together, not separate us. Opening up the licensing to only a select few groups of people will just continue the deterioration of this country. We, the Denver Radio Coalition, have plans to create a viable resource to the Denver Community.

As far as this issue of interference between commercial and community stations, I have observed many corporate radio stations over-modulating and causing the interference. It doesn't require an extreme amount of wattage to reach the Denver area. Through the proper use of limiters and filters (and your help, of course), we can eliminate any problems between the signals. We have some of the equipment already, but will need to upgrade for a 100-1000 Watt conversion.

The licensing should be simple and affordable for communities to get their radio stations running. We have organized a large amount of people who are interested in this project. We are waiting for you to legalize our efforts and stop the injustices due to the crack-down on 'pirate radio'. Please find enclosed copies of petitions that were circulated around Denver. The people of this city, as well as our country, need a voice. We are not a threat to America, we are America.

Sincerely,

Robert A. Bell

List ABCDE: _____

WHAT HAS THE FCC DONE FOR YOU LATELY?

Well, up until a month ago, I would have said that the FCC hasn't done anything for the people lately. Recently, however, the FCC has proposed licensing Low Power FM Radio Stations (see www.fcc.gov for more info). These licenses are for the purpose of community radio stations to develop. Denver Community Radio is the answer to the bland corporate radio that we are experiencing at this time. A radio station that could truly serve the public interest and act as a community resource is what I am proposing. If you agree with these sentiments and/or would like to get involved, please sign the following... Thank You.

WHAT HAS THE FCC DONE FOR YOU LATELY?

Well, up until a month ago, I would have said that the FCC hasn't done anything for the people lately. Recently, however, the FCC has proposed licensing Low Power FM Radio Stations (see www.fcc.gov for more info). These licenses are for the purpose of community radio stations to develop. Denver Community Radio is the answer to the bland corporate radio that we are experiencing at this time. A radio station that could truly serve the public interest and act as a community resource is what I am proposing. If you agree with these sentiments and/or would like to get involved, please sign the following... Thank You.
