

Hello, I'm in favor of adopting the low power station licencing and would loik the opportunity to apply. I have family that lives in Mesquite Nevada, this is a small town which is situated in a valley. The FM reception in this area is horrible. I would like to open a stsion there for the communtiy, I want to provide communtiy news and public interest. The only stations they can recieve are from the bigger towns such as Saint George, Utah, and Las Vegas, Nevada. Here Here for the Fcc to open this avenue to the local community.
