

We greatly desire putting in a small range radio station to play contemporary christian music in our area. So far, every attempt has been shot down due to mainly, lack of frequency. This shouldn't be true since I can only pick up about 15 radio stations in town. I hope and pray that this will be added to the FCC rules and that we will be able to obtain a frequency and broadcast locally. I am looking forward to hearing something more about this and hope to hear from others experiencing the same problems! I will be willing to help anyone in any way I can. Thanks.....Brian
