

We are a group of musicians who would like to operate a low power FM radio station in or around the Manhattan Metropolitan area. We are interested in creating a radio station that would broadcast original music which would otherwise not be heard on current commercial radio stations.

We would like to have the option to choose between a 100 or 1000 watt station. We would also like to have the option to operate either a not-for-profit station or a small commercial station. We feel it would be undemocratic for the FCC to deny us these options.
