

To: Federal Communications Commission

Ref: Low Power FM Radio

Date: 11/13/99

From: Robert R. Schauer

Dear Madams/Sirs,

Low Power FM Broadcasters would certainly be a benefit to local communities. With regard, In that, those with technical ability, a good sense of the industry as a whole and also being in touch with the particular community could provide a product that would include on the spot emergency information such as weather or other immediate information that needs to be conveyed to the public on short notice. Radio Broadcasting as of late has become a monopoly, therefore impersonal. We need to get back to the basics. In other words providing information, Religious inspiration, and entertainment. (IE: Real Radio) Thank You !

Sincerely,

Robert R. Schauer
